Together, we’ll create a path to literacy that is open to all.
**SRA FLEX Literacy** delivers **Powerful**
technology-based instruction to accelerate learning outcomes for students of all ability levels.

**SRA FLEX Literacy** fits **Flexible**
the needs of all districts through implementations that work regardless of class size or schedule.

**SRA FLEX Literacy** provides **Data-Driven**
dynamic, individualized learning through differentiation and continuous progress monitoring.

**SRA FLEX Literacy**® fosters reading achievement for all learners using powerful technology that **individualizes** instruction, **motivates** students, and **accelerates** learning.

By creating a student-specific learning path, the research-based instructional model in **FLEX Literacy** supports students every step of the way. Through ongoing progress monitoring, teachers stay informed to make data-driven decisions that maximize time and learning outcomes.

**Why FLEX Literacy Works**
**FLEX Literacy** uses embedded scaffolded instruction, practice, assessment, acceleration, remediation, and review opportunities to provide comprehensive reading and language arts instruction that is engaging, effective, and easy to use. It is designed to reach students of all levels, from Beginning Reader to 1300L.

- **Students are engaged** by high-interest interactive lessons and rich text selections.
- **Teachers are empowered** to tailor instruction through ongoing assessment that informs effective differentiation.
- **Administrators are equipped** with tools and information necessary for decision making.
**FLEX Literacy** is self-managing and self-paced, with adaptive opportunities for acceleration and remediation.

There are roughly 5,000 activities throughout **FLEX Literacy** that teach more than 100 English Language Arts objectives. The activities in each lesson, guided by animated instructional hosts, provide daily practice or support the student’s individualized skill sequence.

**Gradual Release Model**

**FLEX Literacy** utilizes the Gradual Release model of instruction, which gives students explicit modeling, guided practice (i.e., mediated scaffolding), independent practice, assessment, and maintenance opportunities to help them learn critical reading skills and complex strategies.

**Daily Practice**

On a daily basis, each student receives practice in five activity types:

- Fluency
- Vocabulary Preview
- Reading Practice
- Word Study
- Vocabulary Practice

**Individualized Skill Building**

Each lesson provides scaffolded instruction to help students develop specific skills, including:

- Foundational Skills
- Comprehension
- Grammar, Usage, and Mechanics
- Literary Analysis
- Text Elements
- Vocabulary and Language

**Model**

Engaging animations introduce, explain, and demonstrate skills.

**Guide**

Leveled text passages and supported activities provide guidance and instructional feedback.

**Monitor**

Independent practice activities build toward mastery with embedded opportunities for remediation and acceleration.
**Student Engagement**

Student participation is driven by a game-like interface and navigation. The experience keeps interest levels high by providing ongoing encouragement and engagement as students progress through instructional activities. Students are motivated with reward points, and kept on task by limiting the amount of time allotted to customize their avatar and decorate their personal rooms.

**Differentiated Instruction**

*FLEX Literacy* tailors instruction and practice to meet individual student needs based on continually evaluated student performance. It achieves differentiation through:

- Digital diagnostic placement tests that start students at the appropriate instructional level
- Leveled text passages and scaffolded instruction that ensure concepts and skills are mastered
- Interactive templates that address different learning modalities

- Self-directed lessons that allow students to learn and progress at their own pace
- Acceleration and remediation opportunities that personalize the instructional sequence

**Acceleration**

Students are presented with independent monitored activities until they demonstrate mastery of a skill. The program then accelerates them past the remaining monitor activities, and directly to review and assessment opportunities.

**Remediation**

If a student repeatedly performs below mastery, the program automatically generates a targeted, skill-specific remediation lesson. If online remediation isn’t enough, *FLEXWorks* alerts the teacher that the student needs one-on-one support and provides mini-lessons on the targeted skill.

---

**Student Experience**

1. **Targeted Remediation**
   - Online

2. **Individualized Instruction**
   - Teacher-led

---

- Customizable avatars
- Game-like experience
- Animations and videos
- Instructional games
- Engaging activities
- Personal “room” to decorate
FLEXWorks is a dynamic online system that manages the classroom, assessment, data, instruction, and resources to maximize time and learning. **FLEXWorks**:

- Automatically populates student performance data
- Delivers performance data through a variety of reports
- Informs targeted instruction to meet the individual needs of every student
- Provides all the tools needed for classroom management

**Assessments**

Assessment and performance data collected by both the teacher and system provide a balance of quantitative and qualitative data. **FLEXWorks** informs teachers and administrators through progress reporting on a student, classroom, school, and district level. Assessments in **FLEX Literacy** include:

- Diagnostic Placement Test
- Fluency and Lexile Assessments
- Mastery Checks
- Benchmark Tests
- Student Self-Assessment

**Reports**

A variety of reports provide the teacher with in-depth student performance data in formats that are easy to view, understand, and share. In addition to the district-level comparison reports, you’ll find:

- Lexile Measure Progress report
- State Standards report
- Digital Progress by Lesson report
- Fluency report
- Student Snapshot report
- Class Snapshot report

**Teacher Resources**

**FLEX Literacy** comes with a wealth of resources to ensure smooth and successful implementation. Teachers can find correlations to state standards, scope and sequence information, professional development tools, and classroom support materials such as English learner strategies, foundational skills worksheets, spelling worksheets, contrastive analysis charts, and more.
**Professional Development**

*FLEX Literacy* offers embedded online professional development that gives teachers a deep knowledge of effective implementation strategies and instructional practices.

Our online Professional Learning Environment (PLE) offers:

- 24/7 access to program support
- An online professional community that allows for teacher collaboration
- Interactive learning modules and instructional resources that promote comprehensive program knowledge, including:
  - Quick Start Course that provides all of the tools teachers need to begin using the program with confidence
  - Home-to-School Connection that offers strategies for communicating with families, such as Family Letters in English and Spanish
  - Accessibility strategies that can be used in any classroom to support students with disabilities
- And much more

**Technical Support**

*FLEX Literacy* is maintained and supported by an industry-leading team of developers and technical experts. Our team provides pre- and post-implementation support and is ready to assist with any questions you have along the way. Our goal is to deliver quick, efficient, world-class service to help all our teachers and students succeed.

**Results**

Across the nation and beyond, *FLEX Literacy* is accelerating the literacy skills of all students, from at-risk readers who need support in comprehension to grade-level readers who are looking to boost vocabulary—and everyone in between. Within weeks, most students show progress toward growth targets.

**Testimonials**

*FLEX Literacy* is the first program we have in our elementary school that allows us to track Lexiles. And, it’s the only program that allows us to track student progress toward mastery of state standards.

- **District Literacy Specialist**
  
  Teachers are looking for an individualized program for students, and *FLEX Literacy* is equivalent to a student who is sitting one-to-one with a reading tutor. The teacher knows exactly where the student is, and an entire classroom can work simultaneously with each student at their own level rather than hiring a tutor for small-group instruction once or twice a week.

- **Teacher, Grades 4–5**
  
  My students feel successful doing the program. It’s easy to implement, and the activities are engaging and motivating. The students like the fact that they can get online and ‘play’ even though they are actually learning.

- **Teacher, Grades 6–8**
