### ALEKS & Academic Integrity

With a simple, consistent layout of course resources and assignments, and integrated personalized learning paths to build student confidence, ALEKS makes it easy to create a course that promotes academic integrity.

### Creating high-integrity assessments in ALEKS

Instructors can adjust assignment preferences in ALEKS to suit their needs:

- Leverage assignment policy settings like time limits, exam and question attempts, question randomization
- Require a password to access assignments
- Choose to display (or not display) assignment feedback immediately after student submission to avoid answer sharing
- Limit location of where the assessment can be completed (for example, only accessible via the institution's IP address)
- Allow or disallow access to other ALEKS resources such as the eBook, message centre, examples and guided solutions
