

BLUE PLANET

3rd Edition

Discover English through Science

Blue Planet is a six-level series for elementary students. It integrates science content with English-language instruction and promotes language acquisition in a wide range of interesting topics and contexts.

The Blue Planet series is intended to spark students' imagination and curiosity with exciting science topics and activities. At the same time, it helps students as English-language learners to improve their reading, writing, listening, and speaking skills in English.

A good variety of hands-on activities and experiments help students make a connection between what they see, do, and touch and the scientific basis of their findings, thus making learning about their world both engaging and relevant.

Components

At each level:

- Student Book
- Project Book
- Teacher's Guide

New

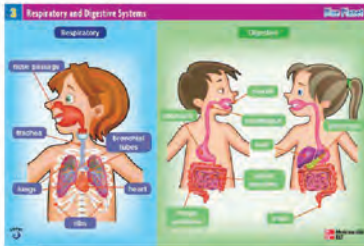

- The Student Book features a QR code in each unit. Watch the video to enjoy and learn more!
- Online Learning Resources

**Explore, Discover,
Learn: Dive into the
Blue Planet Series!**

Attractive visual material in the Student Book, Project Book, Flashcards, and Posters appeals to visual learners.

Posters to reinforce each topic.

Flashcards to make an interactive learning.

Teaching Tip

Students feel proud of the work they do in class, so one way to motivate them to work more and better is to display their work on bulletin boards, classroom walls or hang string and clip their work to it. Invite parents or students and teachers from other classes to see your students' work.

Language Support

Write the words *butterfly* and *baby* on the board. Have students notice they end in *-y*. This is preceded by a consonant, so to form their plural, you change the *y* to an *i* and add *-ies*. *butterflies* and *babies*.

Writing Support

When presenting the information on pages 6 and 7, remind students that all statements should start with a capital letter and end with a period. But if the sentence is a question, it ends with a question mark.

On the TG, there are always tips for a better class.

Blue Planet's a QR Code to connected mobile devices, students gain instant access to introductory videos for each unit. The inclusion of these dynamic videos enhances the learning experience, providing an engaging preview of the captivating content within Blue Planet. Students are invited to connect, explore, and embark on a new dimension of education!
