

Principles of Auditing & Other Assurance Services

O. Ray Whittington | Kurt Pany

1266857664 • 9781266857669

2024 Release

Overview

The Principles of Auditing & Other Assurance Services provides a carefully balanced presentation of auditing theory and practice. Written in a clear and understandable manner, it is particularly appropriate for students who have had limited or no audit experience. The approach is to integrate auditing material with that of previous accounting financial, managerial, and systems courses. The authors organize the text around balance sheet accounts creating a straightforward and user-friendly way to address the risk assessment-based approach to auditing required by both U.S. and international standards. Data analytics is addressed throughout the text with integrated exercises and problems that drive critical thinking and analysis. In conjunction, they incorporate software to drive these employability skills through the use of Tableau and IDEA software and data analytics questions posed in Connect.

What You Need to Know

Data Analytics

The incorporation of software such as Tableau and IDEA with questions available in Connect drive critical thinking skills and analysis. These provide students with career readiness and employability skills.

UWorld CPA Review

UWorld CPA review content is integrated within Connect. Providing the highest quality CPA Exam multiple-choice questions, helping students master what will be in the CPA exam.

This Title has Gone Evergreen

This title is transitioning to an Evergreen delivery model. This means you will have the most relevant and up-to-date content, tools, and accessibility delivered directly to your existing McGraw Hill Connect® course, all without switching editions or building a new course from scratch. If you use the McGraw Hill eBook, your content will be updated automatically. Please talk to your representative about your options if you require a print component. A complete list of Release Notes for this title is available within your Connect course at connect.mheducation.com

Big Changes in this Release

New Application Based Activity (ABA)

The Audit Risk Model ABA asks students to think about and apply the audit risk model in a simulated audit engagement. Students simulate their first week on the job by considering how certain aspects of their newly assigned audit client impact risk assessment and audit planning. More specifically, students are encouraged to think critically and to assess the impact that various client characteristics, decisions, and circumstance have on their engagement team's risk assessment and the overall audit planning process.

New Concept Overview Videos

Organized around the text's PowerPoint slides, these videos highlight important information in each chapter.

New Integrated Excel

The power of Microsoft Excel meets the power of McGraw Hill Connect in our all-new integration of Excel in Connect. Excel now opens seamlessly inside Connect with no need for uploading or downloading any additional files or software. Instructors choose their auto-grading solution, either grading for formula accuracy or for the solution value.

CPA Exam Blueprint

This resource maps the title's Table of Contents to the modules and topics covered in the CPA Exam.
