About the Authors

Zvi Bodie

Boston University

Professor of Finance and Economics Emeritus at Boston University School of Management

Zvi Bodie is Professor Emeritus at Boston University. He earned his Ph.D. in economics from MIT. He has published widely on pension finance and investment strategy and is best known for applying financial theory to life-cycle saving and investing, especially asset-liability matching. Bodie has been a visiting professor at the Harvard Business School and MIT's Sloan School of Management. In 2007, the Retirement Income Industry Association gave him its Lifetime Achievement Award for applied research, and in 2019, the Plan Sponsors Council of America awarded him a lifetime achievement award.

Zvi Bodie

Alex Kane

University of California, San Diego

Professor of Finance and Economics at the Graduate School of International Relations and Pacific Studies at the University of California, San Diego

Alex Kane holds a Ph.D. from the Stern School of Business of New York University and has been Visiting Professor at the Faculty of Economics, University of Tokyo; Graduate School of Business, Harvard; Kennedy School of Government, Harvard; and Research Associate, National Bureau of Economic Research. An author of many articles in finance and management journals, Professor Kane's research is mainly in corporate finance, portfolio management, and capital markets.

Alex Kane

Alan J. Marcus

Boston College

Mario J. Gabelli Professor of Finance at the Carroll School of Management, Boston College

Alan Marcus received his Ph.D. from MIT, has been a Visiting Professor at MIT's Sloan School of Management and Athens Laboratory of Business Administration, and has served as a Research Fellow at the National Bureau of Economic Research, where he participated in both the Pension Economics and the Financial Markets and Monetary Economics Groups. Professor Marcus also spent two years at the Federal Home Loan Mortgage Corporation (Freddie Mac), where he helped to develop mortgage pricing and credit risk models. Professor Marcus has published widely in the fields of capital markets and portfolio theory. He currently serves on the Research Foundation Advisory Board of the CFA Institute.

Alan J. Marcus

Special Contributor, Nicholas Racculia, Saint Vincent College

Nicholas Racculia holds a Ph.D. from Princeton University and serves as Professor of Finance at St. Vincent College. Professor Racculia teaches a wide range of classes in Corporate Finance and Investments. He has significantly participated in the expansion of Chapter 20 on Alternative Assets. His contributions also play a key role in the development of online content for the text.

Brief Contents

Part ONE

ELEMENTS OF INVESTMENTS 1

- 1** Investments: Background and Issues 2
- 2** Asset Classes and Financial Instruments 30
- 3** How Securities Trade 58
- 4** Mutual Funds and Other Investment Companies 91

Part TWO

PORTFOLIO THEORY 115

- 5** Risk, Return, and the Historical Record 116
- 6** Efficient Diversification 151
- 7** Capital Asset Pricing and Arbitrage Pricing Theory 199
- 8** The Efficient Market Hypothesis 231
- 9** Behavioral Finance and Technical Analysis 265

Part THREE

DEBT SECURITIES 291

- 10** Bond Prices and Yields 292
- 11** Managing Bond Portfolios 336

Part FOUR

SECURITY ANALYSIS 371

- 12** Macroeconomic and Industry Analysis 372
- 13** Equity Valuation 403
- 14** Financial Statement Analysis 443

Part FIVE

DERIVATIVE MARKETS 481

- 15** Options Markets 482
- 16** Option Valuation 515
- 17** Futures Markets and Risk Management 553

Part SIX

ACTIVE INVESTMENT MANAGEMENT 587

- 18** Evaluating Investment Performance 588
- 19** International Diversification 625
- 20** Alternative Assets 651
- 21** Taxes, Inflation, and Financial Planning 682
- 22** Investors and the Investment Process 701

Appendixes

- A** References 725
- B** References to CFA Questions 732
- Index 735**

Part ONE

ELEMENTS OF INVESTMENTS 1

1 Investments: Background and Issues 2

- 1.1 Real Assets versus Financial Assets 3
- 1.2 Financial Assets 5
- 1.3 Financial Markets and the Economy 6
 - The Informational Role of Financial Markets* 6
 - Consumption Timing* 7
 - Allocation of Risk* 7
 - Separation of Ownership and Management* 7
 - Stakeholder Capitalism and ESG Investing* 9
 - Corporate Governance and Corporate Ethics* 10
- 1.4 The Investment Process 11
- 1.5 Markets Are Competitive 12
 - The Risk-Return Trade-off* 12
 - Efficient Markets* 13
- 1.6 The Players 13
 - Financial Intermediaries* 14
 - Investment Bankers* 16
 - Venture Capital and Private Equity* 17
 - Fintech, Financial Innovation, and Decentralized Finance* 17
- 1.7 The Financial Crisis of 2008–2009 20
 - Antecedents of the Crisis* 20
 - Changes in Housing Finance* 21
 - Mortgage Derivatives* 23
 - Credit Default Swaps* 23
 - The Rise of Systemic Risk* 24
 - The Shoe Drops* 24
 - The Dodd-Frank Reform Act* 25
- 1.8 Outline of the Text 25

End-of-Chapter Material 26–29

2 Asset Classes and Financial Instruments 30

- 2.1 The Money Market 31
 - Treasury Bills* 31

- Certificates of Deposit* 32
 - Commercial Paper* 32
 - Bankers' Acceptances* 33
 - Eurodollars* 33
 - Repos and Reverses* 33
 - Brokers' Calls* 33
 - Federal Funds* 34
 - LIBOR and Its Replacements* 34
 - Yields on Money Market Instruments* 35
 - Money Market Funds* 35
 - 2.2 The Bond Market 36
 - Treasury Notes and Bonds* 36
 - Inflation-Protected Treasury Bonds* 37
 - Federal Agency Debt* 37
 - International Bonds* 38
 - Municipal Bonds* 38
 - Corporate Bonds* 41
 - Mortgage- and Asset-Backed Securities* 41
 - 2.3 Equity Securities 42
 - Common Stock as Ownership Shares* 42
 - Characteristics of Common Stock* 43
 - Stock Market Listings* 43
 - Preferred Stock* 44
 - Depository Receipts* 45
 - 2.4 Stock and Bond Market Indexes 45
 - Stock Market Indexes* 45
 - The Dow Jones Industrial Average* 45
 - The Standard & Poor's 500 Index* 48
 - Russell Indexes* 48
 - Other U.S. Market Value Indexes* 49
 - Equally Weighted Indexes* 49
 - Foreign and International Stock Market Indexes* 49
 - Bond Market Indicators* 49
 - 2.5 Derivative Markets 51
 - Options* 51
 - Futures Contracts* 52
- End-of-Chapter Material** 53–57

3 How Securities Trade 58

- 3.1 How Firms Issue Securities 59
 - Privately Held Firms* 59
 - Publicly Traded Companies* 60
 - Shelf Registration* 60
 - Initial Public Offerings* 61
 - SPACs versus Traditional IPOs* 63
- 3.2 How Securities Are Traded 63
 - Types of Markets* 63
 - Types of Orders* 64
 - Trading Mechanisms* 66
- 3.3 The Rise of Electronic Trading 68
- 3.4 U.S. Markets 69
 - NASDAQ* 69
 - The New York Stock Exchange* 70
 - ECNs* 71
- 3.5 New Trading Strategies 71
 - Algorithmic Trading* 71
 - High-Frequency Trading* 72
 - Dark Pools* 73
 - Internalization* 74
 - Bond Trading* 74
- 3.6 Globalization of Stock Markets 74
- 3.7 Trading Costs 75
- 3.8 Buying On Margin 76
- 3.9 Short Sales 79
- 3.10 Regulation of Securities Markets 82
 - Self-Regulation* 83
 - The Sarbanes–Oxley Act* 84
 - Insider Trading* 85

End-of-Chapter Material 86–90

4 Mutual Funds and Other Investment Companies 91

- 4.1 Investment Companies 92
- 4.2 Types of Investment Companies 92
 - Unit Investment Trusts* 93
 - Managed Investment Companies* 93
 - Exchange-Traded Funds* 94
 - Other Investment Organizations* 95
- 4.3 Mutual Funds 95
 - Investment Policies* 95
 - How Funds Are Sold* 97
- 4.4 Costs of Investing in Mutual Funds 98
 - Fee Structure* 98
 - Fees and Mutual Fund Returns* 100
- 4.5 Taxation of Mutual Fund Income 102

- 4.6 Exchange-Traded Funds 103
- 4.7 Mutual Fund Investment Performance: A First Look 105
- 4.8 Information on Mutual Funds 107

End-of-Chapter Material 109–113

Part TWO**PORTFOLIO THEORY 115****5 Risk, Return, and the Historical Record 116**

- 5.1 Rates of Return 117
 - Measuring Investment Returns over Multiple Periods* 117
 - Conventions for Annualizing Rates of Return* 119
 - 5.2 Inflation and the Real Rate of Interest 120
 - The Equilibrium Nominal Rate of Interest* 121
 - Treasury Bills and Inflation, 1927–2022* 121
 - 5.3 Risk and Risk Premiums 123
 - Scenario Analysis and Probability Distributions* 123
 - The Normal Distribution* 125
 - Normality and the Investment Horizon* 127
 - Deviation from Normality and Tail Risk* 127
 - Risk Premiums and Risk Aversion* 128
 - The Sharpe Ratio* 130
 - 5.4 The Historical Record 130
 - Using Time Series of Returns* 130
 - Risk and Return: A First Look* 131
 - 5.5 Asset Allocation Across Risky and Risk-Free Portfolios 137
 - The Risk-Free Asset* 137
 - Portfolio Expected Return and Risk* 138
 - The Capital Allocation Line* 139
 - Risk Aversion and Capital Allocation* 140
 - 5.6 Passive Strategies and the Capital Market Line 141
 - Historical Evidence on the Capital Market Line* 141
 - Costs and Benefits of Passive Investing* 142
- End-of-Chapter Material** 143–150

6 Efficient Diversification 151

- 6.1 Diversification and Portfolio Risk 152
- 6.2 Asset Allocation with Two Risky Assets 153
 - Covariance and Correlation* 154
 - The Three Rules of Two-Risky-Assets Portfolios* 157

- The Risk-Return Trade-Off with Two-Risky-Assets Portfolios* 157
- The Mean-Variance Criterion* 158
- Using Historical Data* 161
- 6.3 The Optimal Risky Portfolio with a Risk-Free Asset 163
- 6.4 Efficient Diversification with Many Risky Assets 167
 - The Efficient Frontier of Risky Assets* 167
 - Choosing the Optimal Risky Portfolio* 169
 - The Preferred Complete Portfolio and a Separation Property* 170
 - Constructing the Optimal Risky Portfolio: An Illustration* 170
- 6.5 A Single-Index Stock Market 173
 - Statistical Interpretation of the Single-Index Model* 176
 - Learning from the Index Model* 178
 - Using Security Analysis with the Index Model* 180
- 6.6 Risk Pooling, Risk Sharing, and Time Diversification 182
 - Time Diversification* 184
- End-of-Chapter Material** 185–198

7 Capital Asset Pricing and Arbitrage Pricing Theory 199

- 7.1 The Capital Asset Pricing Model 200
 - The Model: Assumptions and Implications* 200
 - Why All Investors Would Hold the Market Portfolio* 201
 - The Passive Strategy Is Efficient* 202
 - The Risk Premium of the Market Portfolio* 203
 - Expected Returns on Individual Securities* 204
 - The Security Market Line* 205
 - Applications of the CAPM* 207
- 7.2 The CAPM and Index Models 207
- 7.3 How Well Does the CAPM Predict Risk Premiums? 209
- 7.4 Multifactor Models and the CAPM 210
 - The Fama-French Three-Factor Model* 211
 - Estimating a Three-Factor SML* 212
 - Multifactor Models and the Validity of the CAPM* 213
- 7.5 Arbitrage Pricing Theory 214
 - Diversification in a Single-Index Security Market* 214
 - Well-Diversified Portfolios* 215
 - The Security Market Line of the APT* 216
 - Individual Assets and the APT* 217

- Well-Diversified Portfolios in Practice* 217
- The APT and the CAPM* 218
- Multifactor Generalization of the APT* 218
- Smart Betas and Multifactor Models* 220

End-of-Chapter Material 220–230

8 The Efficient Market Hypothesis 231

- 8.1 Random Walks and Efficient Markets 232
 - Competition as the Source of Efficiency* 234
 - Versions of the Efficient Market Hypothesis* 235
- 8.2 Implications of the EMH 236
 - Technical Analysis* 236
 - Fundamental Analysis* 238
 - Active versus Passive Portfolio Management* 238
 - The Role of Portfolio Management in an Efficient Market* 239
 - Resource Allocation* 240
- 8.3 Are Markets Efficient? 240
 - The Issues* 240
 - Weak-Form Tests: Patterns in Stock Returns* 242
 - Predictors of Broad Market Returns* 244
 - Semistrong Tests: Market Anomalies* 245
 - Other Predictors of Stock Returns* 248
 - Strong-Form Tests: Inside Information* 249
 - Interpreting the Anomalies* 249
 - Bubbles and Market Efficiency* 253
- 8.4 Mutual Fund and Analyst Performance 253
 - Stock Market Analysts* 254
 - Mutual Fund Managers* 254
 - So, Are Markets Efficient?* 258
- End-of-Chapter Material** 258–264

9 Behavioral Finance and Technical Analysis 265

- 9.1 The Behavioral Critique 266
 - Information Processing* 267
 - Behavioral Biases* 269
 - Limits to Arbitrage* 270
 - Limits to Arbitrage and the Law of One Price* 272
 - Bubbles and Behavioral Economics* 274
 - Evaluating the Behavioral Critique* 275
- 9.2 Technical Analysis and Behavioral Finance 276
 - Trends and Corrections* 276
 - Machine Learning and Technical Analysis* 281
 - Sentiment Indicators* 282
 - A Warning* 283
- End-of-Chapter Material** 284–290

Part THREE

DEBT SECURITIES 291**10 Bond Prices and Yields 292**

- 10.1 Bond Characteristics 293
 - Treasury Bonds and Notes* 293
 - Corporate Bonds* 295
 - Preferred Stock* 296
 - Other Domestic Issuers* 297
 - International Bonds* 297
 - Innovation in the Bond Market* 297
- 10.2 Bond Pricing 299
 - Bond Pricing between Coupon Dates* 302
 - Bond Pricing in Excel* 303
- 10.3 Bond Yields 304
 - Yield to Maturity* 304
 - Yield to Call* 306
 - Realized Compound Return versus Yield to Maturity* 308
- 10.4 Bond Prices Over Time 310
 - Yield to Maturity versus Holding-Period Return* 311
 - Zero-Coupon Bonds and Treasury STRIPS* 312
 - After-Tax Returns* 313
- 10.5 Default Risk and Bond Pricing 314
 - Junk Bonds* 314
 - Determinants of Bond Safety* 316
 - Bond Indentures* 316
 - Yield to Maturity and Default Risk* 318
 - Credit Default Swaps* 320
- 10.6 The Yield Curve 321
 - The Expectations Theory* 322
 - The Liquidity Preference Theory* 324
 - A Synthesis* 325

End-of-Chapter Material 327–335

11 Managing Bond Portfolios 336

- 11.1 Interest Rate Risk 337
 - Interest Rate Sensitivity* 337
 - Duration* 339
 - What Determines Duration?* 343
- 11.2 Passive Bond Management 345
 - Immunitization* 345
 - Cash Flow Matching and Dedication* 351
- 11.3 Convexity 352
 - Why Do Investors Like Convexity?* 354

- 11.4 Active Bond Management 356
 - Sources of Potential Profit* 356
 - Horizon Analysis* 357
 - An Example of a Fixed-Income Investment Strategy* 357

End-of-Chapter Material 358–369

Part FOUR

SECURITY ANALYSIS 371**12 Macroeconomic and Industry Analysis 372**

- 12.1 The Global Economy 373
- 12.2 The Domestic Macroeconomy 375
 - Gross Domestic Product* 376
 - Employment* 376
 - Inflation* 376
 - Interest Rates* 376
 - Budget Deficit* 376
 - Sentiment* 377
- 12.3 Interest Rates 377
- 12.4 Demand and Supply Shocks 378
- 12.5 Federal Government Policy 380
 - Fiscal Policy* 380
 - Monetary Policy* 380
 - Supply-Side Policies* 381
- 12.6 Business Cycles 382
 - The Business Cycle* 382
 - Economic Indicators* 383
- 12.7 Industry Analysis 386
 - Defining an Industry* 387
 - Sensitivity to the Business Cycle* 389
 - Sector Rotation* 390
 - Industry Life Cycles* 391
 - Industry Structure and Performance* 393

End-of-Chapter Material 394–402

13 Equity Valuation 403

- 13.1 Valuation by Comparables 404
 - Limitations of Book Value* 405
- 13.2 Intrinsic Value Versus Market Price 405
- 13.3 Dividend Discount Models 407
 - The Constant-Growth DDM* 408
 - Stock Prices and Investment Opportunities* 410

- Life Cycles and Multistage Growth Models* 413
- Multistage Growth Models* 417
- 13.4 Price–Earnings Ratios 418
 - The Price–Earnings Ratio and Growth Opportunities* 418
 - P/E Ratios and Stock Risk* 422
 - Pitfalls in P/E Analysis* 422
 - The Cyclically Adjusted P/E Ratio* 424
 - Combining P/E Analysis and the DDM* 425
 - Other Comparative Valuation Ratios* 425
- 13.5 Free Cash Flow Valuation Approaches 426
 - Comparing the Valuation Models* 429
 - The Problem with DCF Models* 430
- 13.6 The Aggregate Stock Market 430
 - End-of-Chapter Material** 432–442

14 Financial Statement Analysis 443

- 14.1 The Major Financial Statements 444
 - The Income Statement* 444
 - The Balance Sheet* 445
 - The Statement of Cash Flows* 446
- 14.2 Measuring Firm Performance 448
- 14.3 Profitability Measures 448
 - Return on Assets* 449
 - Return on Capital* 449
 - Return on Equity* 449
 - Financial Leverage and ROE* 449
 - Economic Value Added* 451
- 14.4 Ratio Analysis 452
 - Decomposition of ROE* 452
 - Turnover and Asset Utilization* 455
 - Liquidity Ratios* 457
 - Market Price Ratios* 458
 - Choosing a Benchmark* 460
- 14.5 An Illustration of Financial Statement Analysis 460
- 14.6 Comparability Problems 463
 - Inventory Valuation* 463
 - Depreciation* 464
 - Inflation and Interest Expense* 465
 - Fair Value Accounting* 465
 - Quality of Earnings and Accounting Practices* 466
 - International Accounting Conventions* 468
- 14.7 Value Investing: The Graham Technique 469
 - End-of-Chapter Material** 470–480

Part FIVE

DERIVATIVE MARKETS 481

15 Options Markets 482

- 15.1 The Option Contract 483
 - Options Trading* 484
 - American versus European Options* 485
 - The Option Clearing Corporation* 485
 - Other Listed Options* 486
 - 15.2 Values of Options at Expiration 487
 - Call Options* 487
 - Put Options* 488
 - Options versus Stock Investments* 489
 - 15.3 Option Strategies 491
 - 15.4 Optionlike Securities 499
 - Callable Bonds* 499
 - Convertible Securities* 500
 - Warrants* 502
 - Collateralized Loans* 502
 - Leveraged Equity and Risky Debt* 504
 - 15.5 Exotic Options 504
 - Asian Options* 504
 - Currency-Translated Options* 504
 - Digital Options* 504
 - End-of-Chapter Material** 505–514
- #### **16 Option Valuation 515**
- 16.1 Option Valuation: Introduction 516
 - Intrinsic and Time Values* 516
 - Determinants of Option Values* 517
 - 16.2 Binomial Option Pricing 518
 - Two-State Option Pricing* 518
 - Generalizing the Two-State Approach* 521
 - Making the Valuation Model Practical* 522
 - 16.3 Black-Scholes Option Valuation 526
 - The Black-Scholes Formula* 526
 - Implied Volatility* 530
 - The Put-Call Parity Relationship* 532
 - Put Option Valuation* 535
 - 16.4 Using the Black-Scholes Formula 536
 - Hedge Ratios and the Black-Scholes Formula* 536
 - Portfolio Insurance* 537
 - Option Pricing and the Financial Crisis* 540
 - 16.5 Empirical Evidence 541
 - End-of-Chapter Material** 542–552

17 Futures Markets and Risk Management 553

- 17.1 The Futures Contract 554
 - The Basics of Futures Contracts* 554
 - Existing Contracts* 557
 - 17.2 Trading Mechanics 557
 - The Clearinghouse and Open Interest* 557
 - Marking to Market and the Margin Account* 560
 - The Convergence Property* 561
 - Cash versus Actual Delivery* 562
 - Regulations* 563
 - Taxation* 563
 - 17.3 Futures Market Strategies 563
 - Hedging and Speculation* 563
 - Basis Risk and Hedging* 566
 - 17.4 Futures Prices 566
 - Spot-Futures Parity* 566
 - Spreads* 570
 - 17.5 Financial Futures 571
 - Stock-Index Futures* 571
 - Foreign Exchange Futures* 573
 - Interest Rate Futures* 573
 - 17.6 Swaps 576
 - Swaps and Balance Sheet Restructuring* 577
 - The Swap Dealer* 577
- End-of-Chapter Material** 578–585

Part SIX

ACTIVE INVESTMENT MANAGEMENT 587

18 Evaluating Investment Performance 588

- 18.1 Conventional Performance Evaluation 589
 - Average Rates of Return* 589
 - Time-Weighted Returns versus Dollar-Weighted Returns* 589
 - Adjusting Returns for Risk* 590
 - Risk-Adjusted Performance Measures* 591
 - The Sharpe Ratio for Overall Portfolios* 592
 - The Treynor Ratio* 594
 - The Information Ratio* 596
 - The Role of Alpha in Performance Measures* 597
 - Implementing Performance Measurement: An Example* 598
 - Selection Bias and Portfolio Evaluation* 600

- 18.2 Style Analysis 600
 - 18.3 Morningstar's Risk-Adjusted Rating 602
 - 18.4 Performance Measurement with Changing Portfolio Composition 603
 - 18.5 Market Timing 604
 - The Potential Value of Market Timing* 606
 - Valuing Market Timing as a Call Option* 607
 - The Value of Imperfect Forecasting* 608
 - 18.6 Performance Attribution Procedures 609
 - Asset Allocation Decisions* 610
 - Sector and Security Selection Decisions* 611
 - Summing Up Component Contributions* 612
- End-of-Chapter Material** 613–624

19 International Diversification 625

- 19.1 Global Markets For Equities 626
 - Developed Countries* 626
 - Emerging Markets* 627
 - Market Capitalization and GDP* 627
 - Home-Country Bias* 628
 - 19.2 Exchange Rate Risk and International Diversification 629
 - Exchange Rate Risk* 629
 - Imperfect Exchange Rate Risk Hedging* 633
 - Investment Risk in International Markets* 634
 - International Diversification* 636
 - Are Benefits from International Diversification Preserved in Bear Markets?* 638
 - 19.3 Political Risk 640
 - 19.4 International Investing and Performance Attribution 643
 - Constructing a Benchmark Portfolio of Foreign Assets* 643
 - Performance Attribution* 644
- End-of-Chapter Material** 645–650

20 Alternative Assets 651

- 20.1 Alternative Assets 652
 - The Alternative Asset Universe* 652
 - Alternative Assets versus Traditional Assets* 653
 - Growth of Alternative Assets* 654
- 20.2 Hedge Funds 655
 - Hedge Fund Strategies* 655
 - Statistical Arbitrage* 657
 - High-Frequency Strategies* 658
 - Portable Alpha* 658

20.3	Venture Capital and Angel Investors 660	21.4	Accounting for Taxes 690
	<i>Angel Investors 660</i>	21.5	Tax Shelters and the Savings Plan 691

Organization of the 2024 Release

Essentials of Investments is intended as a textbook on investment analysis most applicable for a student's first course in investments. The chapters are written in a modular format to give instructors the flexibility to either omit certain chapters or rearrange their order. The highlights in the margins describe updates and important features in this release.

This part lays out the general framework for the investment process in a nontechnical manner. We discuss the major players in the financial markets and provide an overview of security types and trading mechanisms. These chapters make it possible for instructors to assign term projects analyzing securities early in the course.

Includes sections on securitization, the financial crisis, and recent developments in Fintech.

Extensive coverage of the rise of electronic markets, algorithmic and high-speed trading, and changes in market structure.

Includes coverage of innovations in exchange-traded funds.

This part contains the core of modern portfolio theory. For courses emphasizing security analysis, this part may be skipped without loss of continuity.

All data are updated and available on the web through the Connect resources. The data are used to discuss risk management and tail risk.

Introduces simple in-chapter spreadsheets that can be used to compute investment opportunity sets and the index model.

Includes single-factor as well as multifactor models.

Considers evidence both supporting and refuting efficient markets and a new section on the factor zoo.

Contains extensive treatment of behavioral finance and provides an introduction to technical analysis.

Part ONE

ELEMENTS OF INVESTMENTS 1

- 1 Investments: Background and Issues 2
- 2 Asset Classes and Financial Instruments 30
- 3 How Securities Trade 58
- 4 Mutual Funds and Other Investment Companies 91

Part TWO

PORTFOLIO THEORY 115

- 5 Risk, Return, and the Historical Record 116
- 6 Efficient Diversification 151
- 7 Capital Asset Pricing and Arbitrage Pricing Theory 199
- 8 The Efficient Market Hypothesis 231
- 9 Behavioral Finance and Technical Analysis 265

Part THREE		This is the first of three parts on security valuation.
DEBT SECURITIES 291		Includes material on credit default swaps.
10	Bond Prices and Yields 292	Contains spreadsheet material on duration and convexity.
11	Managing Bond Portfolios 336	This part is presented in a “top-down” manner, starting with the broad macroeconomic environment before moving to more specific analysis.
Part FOUR		Discusses how international political developments can have major impacts on economic prospects.
SECURITY ANALYSIS 371		Contains free cash flow equity valuation models as well as a discussion of the pitfalls of discounted cash flow models.
12	Macroeconomic and Industry Analysis 372	
13	Equity Valuation 403	
14	Financial Statement Analysis 443	Includes a top-down rationale for how ratio analysis can be organized to guide one’s analysis of firm performance.
Part FIVE		This part highlights how these markets have become crucial and integral to the financial universe and are major sources of innovation.
DERIVATIVE MARKETS 481		
15	Options Markets 482	Offers thorough introduction to option payoffs, strategies, and securities with embedded options.
16	Option Valuation 515	
17	Futures Markets and Risk Management 553	Includes an introduction to risk-neutral valuation methods and their implementation in the binomial option-pricing model.
Part SIX		This part unifies material on active management and is ideal for a closing-semester unit on applying theory to actual portfolio management.
ACTIVE INVESTMENT MANAGEMENT 587		Rigorous development of performance evaluation methods.
18	Evaluating Investment Performance 588	Provides evidence on political risk as well as the benefits of international diversification.
19	International Diversification 625	A new chapter devoted to both hedge funds as well as private equity.
20	Alternative Assets 651	
21	Taxes, Inflation, and Financial Planning 682	Employs extensive spreadsheet analysis of the interaction of taxes and inflation on long-term financial strategies.
22	Investors and the Investment Process 701	Modeled after the CFA Institute curriculum, also includes guidelines on “How to Become a Chartered Financial Analyst.”

Changes in This Release

Based on user feedback, we have made numerous improvements and refinements in this release. We updated every chapter to reflect current market practices and conditions and have improved the end-of-chapter material. Data have been updated throughout. More substantive changes are listed below.

Chapter-by-Chapter Changes

Chapter 1: Investments: Background and Issues

This chapter greatly expands its treatment of recent controversies about stakeholder capitalism and ESG investing. It also further expands its treatment of Fintech, cryptocurrencies, and other digital assets.

Chapter 2: Asset Classes and Financial Instruments

The chapter addresses changes in markets, most notably the replacement of LIBOR with new rates such as SOFR.

Chapter 3: Securities Markets

New material on SPACs, order internalization, and the GameStop squeeze has been added to this chapter.

Chapter 5: Risk, Return, and the Historical Record

In addition to thorough updating, this chapter has been extensively edited to improve flow and understanding.

Chapter 6: Efficient Diversification

This chapter has been reorganized for clarity. In particular, the section on using historical data has been set off from the material on portfolio risk and covariance structure.

Chapter 8: The Efficient Market Hypothesis

The debate on efficient markets has been further developed. The chapter now includes a discussion of Shiller's fads hypothesis, as well as new material on extra-market risk factors. The chapter also introduces students to "the factor zoo" and the challenges posed by data snooping for the interpretation of empirical evidence on risk and return.

Chapter 9: Behavioral Finance and Technical Analysis

The material on behavioral finance now includes confirmation bias. The section on technical analysis includes a new discussion of machine learning.

Chapter 12: Macroeconomic and Industry Analysis

The discussion of the macroeconomy has been updated to include lessons learned during the COVID pandemic, particularly the implications of supply-side and supply-chain issues for inflation. The chapter also introduces the notion of quantitative easing.

Chapter 17: Futures Markets and Risk Management

The treatment of interest rate swaps has been updated to account for the transition away from the LIBOR rate.

Chapter 20: Alternative Assets

This chapter, originally entitled Hedge Funds, now has a wider focus on alternative assets. It includes substantial coverage of private equity, including angel investing, venture capital, and leveraged buyouts.

Chapter 22: Investors and the Investment Process

This chapter has been substantially reorganized, in particular its treatment of tax sheltering and top-down asset allocation.

Pedagogical Features

Learning Objectives

Each chapter begins with a summary of the chapter learning objectives, providing students with an overview of the concepts they should understand after reading the chapter. The end-of-chapter problems and CFA questions are tagged with the corresponding learning objective.

Learning Objectives:

- LO 8-1 Demonstrate why security price changes should be essentially unpredictable in an efficient market.
- LO 8-2 Cite evidence that supports and contradicts the efficient market hypothesis.
- LO 8-3 Provide interpretations of various stock market “anomalies.”
- LO 8-4 Formulate investment strategies that make sense in informationally efficient markets.

Chapter Overview

Each chapter begins with a brief narrative to explain the concepts that will be covered in more depth. Relevant web-sites related to chapter material can be found in Connect. These sites make it easy for students to research topics further and retrieve financial data and information.

This chapter will provide you with a broad introduction to the many venues and procedures available for trading securities. We will see that trading mechanisms range from direct negotiation among market participants to fully automated computer crossing of trade orders.

The first time a security trades is when it is issued to the public. Therefore, we begin with a look at how securities are initially marketed to the public by investment bankers, the mid-wives of securities. We turn next to a broad survey of how already-issued securities may be traded among investors, focusing on the differences between dealer markets, electronic

markets, and formal stock exchanges. With this background, we then turn to specific trading arenas such as the New York Stock Exchange, Nasdaq, and several all-electronic markets. We compare the mechanics of trade execution and the impact of cross-market integration of trading.

We then turn to the essentials of some specific types of transactions, such as buying on margin and short-selling stocks. We close the chapter with a look at some important aspects of the regulations governing security trading, including insider trading laws, circuit breakers, and the role of security markets as self-regulating organizations.

Key Terms in the Margin

Key terms are indicated in color and defined in the margin the first time the term is used. A full list of key terms is included in the end-of-chapter materials.

6.5 A SINGLE-INDEX STOCK MARKET

We started this chapter with the distinction between systematic and firm-specific risk. Systematic risk is macroeconomic, affecting all securities, while firm-specific risk factors affect only one particular firm or, at most, a cluster of firms. **Index models** are statistical tools designed to estimate these two components of risk for a particular security or portfolio. The first to use an index model to explain the benefits of diversification was another Nobel Prize winner, William F. Sharpe (1963). We will introduce his major work (the capital asset pricing

index model

Model that relates stock returns to returns on both a broad market index and firm-specific factors.

Numbered Equations

Key equations are called out in the text and identified by equation numbers. These key formulas are listed at the end of each chapter. Equations that are frequently used are also featured on the text's end sheets for convenient reference.

be necessary to provide an after-tax return equal to that of municipals. To derive this value, we set after-tax yields equal and solve for the *equivalent taxable yield* of the tax-exempt bond. This is the rate a taxable bond would need to offer in order to match the after-tax yield on the tax-free municipal.

$$r_{\text{taxable}}(1 - t) = r_{\text{muni}} \quad (2.1)$$

or

$$r_{\text{taxable}} = \frac{r_{\text{muni}}}{1 - t} \quad (2.2)$$

Thus, the equivalent taxable yield is simply the tax-free rate divided by $1 - t$. Table 2.2 presents equivalent taxable yields for several municipal yields and tax rates.

On the MARKET FRONT

MONEY MARKET FUNDS AND THE FINANCIAL CRISIS OF 2008–2009

Money market funds are mutual funds that invest in the short-term debt instruments that comprise the money market. They are required to hold only short-maturity debt of the highest quality. The average maturity of their holdings must be maintained at less than three months. Because of this very conservative investment profile, money market funds typically experience extremely low price risk. Investors for their part usually acquire check-writing privileges with their funds and often use them as a close substitute for a bank account. This is feasible because the funds almost always maintain share value at \$1 and pass along all investment earnings to their investors as interest.

Until 2008, only one fund had "broken the buck," that is, suffered losses large enough to force value per share below \$1. But when Lehman Brothers filed for bankruptcy protection on September 15, 2008, several funds that had invested heavily in its commercial paper suffered large losses. The next day, Reserve Primary Fund, the oldest money market fund, broke the buck when its value per share fell to only \$0.97.

The realization that money market funds were at risk in the credit crisis led to a wave of investor redemptions similar to a run on a bank. In response, the U.S. Treasury announced that it would make federal insurance available to money market funds willing to pay an insurance fee. This program would thus be similar to FDIC

run, it put the government on the hook for a potential liability of up to \$3 trillion—the assets held in money market funds at the time.

Moreover, the turmoil in Wall Street's money market funds had already spilled over into "Main Street." Fearing further investor redemptions, money market funds became afraid to commit funds even over short periods, and their demand for commercial paper effectively dried up. Firms throughout the economy had come to depend on those markets as a major source of short-term finance for expenditures ranging from salaries to inventories. The breakdown in the money markets and the interruption in normal sources of short-term financing already had a crippling effect on the broad economy.

In the aftermath of the crisis, U.S. regulators instituted a series of reforms to reduce the risks of runs on these funds. Institutional money market funds (those servicing institutions rather than retail investors) were required to "float" the prices of their shares based on the value of their assets rather than maintain a fixed \$1 value per share. This limits the incentive during a crisis for investors to compete to be the first to withdraw funds while share prices are maintained at a nonsustainable level of \$1.

In 2023, the SEC adopted several changes to the rules governing money market funds. Among these are new requirements that institutional funds impose "liquidity fees" when daily net redemptions exceed 5% of fund assets. To further limit the volatility of net asset value, the SEC also increased the minimum allowed share of money market fund assets that mature within one day from 10% to 25% and increased the minimum share maturity to less than a

On the Market Front Boxes

Current articles from financial publications such as *The Wall Street Journal* are featured as boxed readings. Each box is referred to within the narrative of the text, and its real-world relevance to the chapter material is clearly defined.

Why does it make sense for shelf registration to be limited in time?

CONCEPT
check 3.1

Concept Checks

These self-test questions in the body of the chapter enable students to determine whether the preceding material has been understood and then reinforce understanding before students read further. Detailed Solutions to the Concept Checks are found at the end of each chapter.

EXAMPLE 2.4

Value-Weighted Indexes

Look again at Table 2.3. The final value of all outstanding stock in our two-stock universe is \$690 million. The initial value was \$600 million. Therefore, if the initial level of a market value-weighted index of stocks ABC and XYZ were set equal to an arbitrarily chosen starting value such as 100, the index value at year-end would be $100 \times (690/600) = 115$. The increase in the index would reflect the 15% return earned on a portfolio consisting of those two stocks held in proportion to outstanding market values.

Unlike the price-weighted index, the value-weighted index gives more weight to ABC. Whereas the price-weighted index fell because it was dominated by higher-priced XYZ, the value-weighted index rose because it gave more weight to ABC, the stock with the higher total market value.

Note also from Tables 2.3 and 2.4 that market value-weighted indexes are unaffected by stock splits. The total market value of the outstanding XYZ stock increases from \$100 million to \$110 million regardless of the stock split, thereby rendering the split irrelevant to the performance of the index.

Numbered Examples

Numbered and titled examples are integrated in each chapter. Using the worked-out solutions to these examples as models, students can learn how to solve specific problems step-by-step as well as gain insight into general principles by seeing how they are applied to answer concrete questions.

Excel Integration

Excel Applications

Because many courses now require students to perform analyses in spreadsheet format, Excel has been integrated throughout the book. It is used in examples as well as in this chapter feature, which shows students how to create and manipulate spreadsheets to solve specific problems. This feature starts with an example presented in the chapter, briefly discusses how a spreadsheet can be valuable for investigating the topic, shows a sample spreadsheet, and asks students to apply the data to answer questions. These applications also direct the student to the web to work with an interactive version of the spreadsheet. The spreadsheet files are available for download in Connect; available spreadsheets are denoted by an icon. As extra guidance, the spreadsheets include a comment feature that documents both inputs and outputs. Solutions for these exercises are located on the password-protected instructor site only, so instructors can assign these exercises either for homework or just for practice.

Excel application spreadsheets are available for the following:

- Chapter 3:** Buying on Margin; Short Sales
- Chapter 6:** Estimating the Index Model
- Chapter 11:** Immunization; Convexity
- Chapter 15:** Options, Stock, and Lending; Straddles and Spreads
- Chapter 17:** Spot-Futures Parity
- Chapter 18:** Performance Measurement; Performance Attribution
- Chapter 19:** International Diversification

Spreadsheet exhibit templates are also available for the following:

- Chapter 5:** Spreadsheet 5.1
- Chapter 6:** Spreadsheets 6.1–6.7
- Chapter 10:** Spreadsheets 10.1 & 10.2
- Chapter 11:** Spreadsheets 11.1 & 11.2
- Chapter 13:** Spreadsheets 13.1 & 13.2
- Chapter 16:** Spreadsheet 16.1
- Chapter 21:** Spreadsheets 21.1–21.8

Buying on Margin

EXCEL
APPLICATIONS

The Excel spreadsheet model below makes it easy to analyze the impacts of different margin levels and the volatility of stock prices. It also allows you to compare return on investment for a margin trade with a trade using no borrowed funds.

This spreadsheet is available in Connect

	A	B	C	D	E	F	G	H
1								
2			Action or Formula	Ending	Return on		Ending	Return with
3			for Column B	St Price	Investment		St Price	No Margin
4		Enter data

23	Return on Investment	-42.00%	B20/B21					

Microsoft Excel

Excel Questions

- Suppose you buy 100 shares of stock initially selling for \$50, borrowing 25% of the necessary funds from your broker; that is, the initial margin on your purchase is 25%. You pay an interest rate of 8% on margin loans.
 - How much of your own money do you invest? How much do you borrow from your broker?
 - What will be your rate of return for the following stock prices at the end of a one-year holding period?
 - \$40; (ii) \$50; (iii) \$60.

End-of-Chapter Features

McGraw Hill connect Select problems are available in McGraw Hill Connect. Please see the Supplements section of the book's frontmatter for more information. **PROBLEM SETS**

1. In forming a portfolio of two risky assets, what must be true of the correlation coefficient between their returns if there are to be gains from diversification? Explain. (LO 6-1)

2. When adding a risky asset to a portfolio of many risky assets, which property of the asset the maintenance margin is 30%? Assume the price fall happens immediately.

Z Templates and spreadsheets are available in Connect

19. You are bearish on Telecom and decide to sell short 100 shares at the current market price of \$50 per share. (LO 3-4)

a. How much in cash or securities must you put into your brokerage account if the broker's initial margin requirement is 50% of the value of the short position?

b. How high can the price of the stock go before you get a margin call if the maintenance margin is 30% of the value of the short position?

11. Where would an illiquid security in a developing economy *most likely* trade? (LO 3-3)

a. Broker markets.
b. Electronic crossing networks.
c. Electronic limit-order markets.

12. Are the following statements true or false? If false, correct them. (LO 3-4)

a. Investors who wish to sell shares immediately should ask their brokers to enter limit orders.
b. The ask price is less than the bid price.

KAPLAN
SCHWESER

CFA
PROBLEMS

CFA Problems

1. Jones Group has been generating stable after-tax return on equity (ROE) despite declining operating income. Explain how it might be able to maintain its stable after-tax ROE. (LO 14-3)

2. Which of the following *best* explains a ratio of "net sales to average net fixed assets" that *exceeds* the industry average? (LO 14-3)

a. The firm added to its plant and equipment in the past few years.
b. The firm makes less efficient use of its assets than other firms.
c. The firm has a lot of old plant and equipment.
d. The firm uses straight-line depreciation.

WEB master

1. Go to the website for The Walt Disney Co. (DIS) and download its most recent annual report (its 10-K). Locate the company's Consolidated Balance Sheets and answer these questions:

a. How much preferred stock is Disney authorized to issue? How much has been issued?
b. How much common stock is Disney authorized to issue? How many shares are currently outstanding?
c. Search for the term "Financing Activities." What is the total amount of borrowing listed for Disney? How much of this is medium-term notes?
d. What other types of debt does Disney have outstanding?

2. Not all stock market indexes are created equal. Different methods are used to calculate various indexes, and different indexes will yield different assessments of "market performance." Using one of the following data sources, retrieve the stock price for five different firms on the first and last trading days of the previous month.

Problem Sets

We strongly believe that practice in solving problems is a critical part of learning investments, so we provide a good variety. We have arranged questions by level of difficulty.

Excel Problems

Select end-of-chapter questions require the use of Excel. These problems are denoted with an icon. Templates and spreadsheets are available in Connect.

Kaplan-Schweser Problems

Each chapter contains select CFA-style questions derived from the Kaplan-Schweser CFA preparation courses. These questions are tagged with an icon for easy reference.

CFA Problems

We provide several questions from past CFA exams in applicable chapters. These questions represent the kinds of questions that professionals in the field believe are relevant to the practicing money manager. Appendix B, at the back of the book, lists each CFA question and the level and year of the CFA Exam it was included in, for easy reference when studying for the exam.

Web Master Exercises

These exercises are a great way to allow students to test their skills on the Internet. Each exercise consists of an activity related to practical problems and real-world scenarios.

Supplements

MCGRAW HILL CONNECT®

Less Managing. More Teaching. Greater Learning.

McGraw Hill Connect is an online assignment and assessment solution that connects students with the tools and resources they'll need to achieve success. McGraw Hill Connect helps prepare students for their future by enabling faster learning, more efficient studying, and higher retention of knowledge.

McGraw Hill Connect Features

Connect offers a number of powerful tools and features to make managing assignments easier, so faculty can spend more time teaching. With Connect, students can engage with their coursework anytime and anywhere, making the learning process more accessible and efficient. Connect offers you the features described below.

Simple Assignment Management

With Connect, creating assignments is easier than ever, so you can spend more time teaching and less time managing. The assignment management function enables you to:

- Create and deliver assignments easily with selectable end-of-chapter questions and Test Bank items.
- Streamline lesson planning, student progress reporting, and assignment grading to make classroom management more efficient than ever.
- Go paperless with the eBook and online submission and grading of student assignments.

Smart Grading

When it comes to studying, time is precious. Connect helps students learn more efficiently by providing feedback and practice material when they need it, where they need it. When it comes to teaching, your time also is precious. The grading function enables you to:

- Have assignments scored automatically, giving students immediate feedback on their work and side-by-side comparisons with correct answers.
- Access and review each response; manually change grades or leave comments for students to review.
- Reinforce classroom concepts with practice tests and instant quizzes.

Instructor Library

The Connect Instructor Library is your repository for additional resources to improve student engagement in and out of class. You can select and use any asset that enhances your lecture. The following supplements are available for quick download and convenient access via the Instructor Resource Library available through McGraw Hill Connect.

- **Instructor's Manual** Revised by Nicholas Racculia, St. Vincent College, this instructional tool provides an integrated learning approach revised for this release. Each chapter includes a Chapter Overview, Learning Objectives, and Presentation of Material that outlines and organizes the material around the PowerPoint Presentation.
- **Solutions Manual** The Solutions Manual, carefully revised by the authors with assistance from Nicholas Racculia, contains solutions to all basic, intermediate, and challenge problems found at the end of each chapter.
- **Test Bank** Prepared by Nicholas Racculia, the Test Bank contains more than 1,200 questions and includes over 220 new questions. Each question is ranked by level of difficulty (easy, medium, hard) and tagged with the learning objective, the topic, AACSB, and Bloom's Taxonomy, which allows greater flexibility in creating a test. The Test Bank is assignable within Connect.
- **Test Builder** Available within McGraw Hill Connect®, Test Builder is a cloud-based tool that enables instructors to format tests that can be printed, administered within a Learning Management System, or exported as a Word document. Test Builder offers a modern, streamlined interface for easy content configuration that matches course needs, without requiring a download.

Test Builder allows you to

- access all test bank content from a particular title.
- easily pinpoint the most relevant content through robust filtering options.
- manipulate the order of questions or scramble questions and/or answers.
- pin questions to a specific location within a test.
- determine your preferred treatment of algorithmic questions.

- choose the layout and spacing.
- add instructions and configure default settings.
- Test Builder provides a secure interface for better protection of content and allows for just-in-time updates to flow directly into assessments.
- **PowerPoint Presentations** These presentation slides, developed by Leslie Rush from the University of Hawaii, contain figures and tables from the text, key points, and summaries in a visually stimulating collection of slides. These slides follow the order of the chapters, but if you have PowerPoint software, you may customize the program to fit your lecture.

Evergreen

Content and technology are ever-changing, and it is important that you can keep your course up to date with the latest information and assessments. That's why we want to deliver the most current and relevant content for your course, hassle-free.

Bodie, Kane, and Marcus, *Essentials of Investments* is moving to an Evergreen delivery model, which means it has content, tools, and technology that is updated and relevant, with updates delivered directly to your existing McGraw Hill Connect® course. Engage students and freshen up assignments with up-to-date coverage of select topics and assessments, all without having to switch editions or build a new course.

Reflecting the Diverse World Around Us

McGraw Hill believes in unlocking the potential of every learner at every stage of life. To accomplish that, we are dedicated to creating products that reflect, and are accessible to, all the diverse, global customers we serve. Within McGraw Hill, we foster a culture of belonging, and we work with partners who share our commitment to equity, inclusion, and diversity in all forms. In McGraw Hill Higher Education, this includes, but is not limited to, the following:

- Refreshing and implementing inclusive content guidelines around topics including generalizations and

stereotypes, gender, abilities/disabilities, race/ethnicity, sexual orientation, diversity of names, and age.

- Enhancing best practices in assessment creation to eliminate cultural, cognitive, and affective bias.
- Maintaining and continually updating a robust photo library of diverse images that reflect our student populations.
- Including more diverse voices in the development and review of our content.
- Strengthening art guidelines to improve accessibility by ensuring meaningful text and images are distinguishable and perceivable by users with limited color vision and moderately low vision.

Read Anywhere® App

Read or study when it's convenient with McGraw Hill's free ReadAnywhere® app. Available for iOS and Android smartphones or tablets, it gives users access to McGraw Hill tools including the eBook and SmartBook® or Adaptive Learning Assignments in McGraw Hill Connect®. Students can take notes, highlight, and complete assignments offline—all their work will sync when connected to WiFi. Students log in with their Connect username and password to start learning—anytime, anywhere!

Proctorio: Remote Proctoring and Browser-Locking Capabilities

Remote proctoring and browser-locking capabilities, hosted by Proctorio within Connect, provide control of the assessment environment by enabling security options and verifying the identity of the student.

Seamlessly integrated within Connect, these services allow instructors to control the assessment experience by verifying identification, restricting browser activity, and monitoring student actions.

Instant and detailed reporting gives instructors an at-a-glance view of potential academic integrity concerns, thereby avoiding personal bias and supporting evidence-based claims.

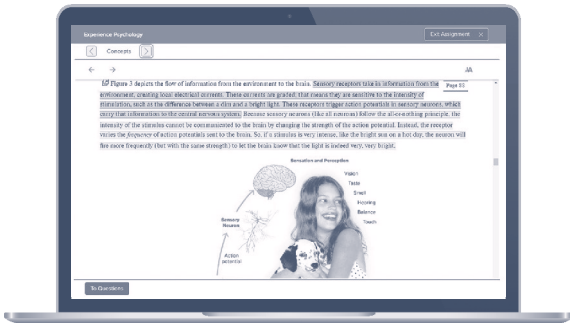

A complete course platform

Connect enables you to build deeper connections with your students through cohesive digital content and tools, creating engaging learning experiences. We are committed to providing you with the right resources and tools to support all your students along their personal learning journeys.

65%
Less Time
Grading

Every learner is unique

In Connect, instructors can assign an adaptive reading experience with SmartBook[®] 2.0. Rooted in advanced learning science principles, SmartBook[®] 2.0 delivers each student a personalized experience, focusing students on their learning gaps, ensuring that the time they spend studying is time well spent. mheducation.com/highered/connect/smartbook

Study anytime, anywhere

Encourage your students to download the free ReadAnywhere[®] app so they can access their online eBook, SmartBook[®] 2.0, or Adaptive Learning Assignments when it's convenient, even when they're offline. And since the app automatically syncs with their Connect account, all of their work is available every time they open it. Find out more at mheducation.com/readanywhere

***"I really liked this app—
it made it easy to study
when you don't have your
textbook in front of you."***

Jordan Cunningham, a student at
Eastern Washington University

Effective tools for efficient studying

Connect is designed to help students be more productive with simple, flexible, intuitive tools that maximize study time and meet students' individual learning needs. Get learning that works for everyone with Connect.

Education for all

McGraw Hill works directly with Accessibility Services departments and faculty to meet the learning needs of all students. Please contact your Accessibility Services Office, and ask them to email accessibility@mheducation.com, or visit mheducation.com/about/accessibility for more information.

Affordable solutions, added value

Make technology work for you with LMS integration for single sign-on access, mobile access to the digital textbook, and reports to quickly show you how each of your students is doing. And with our Inclusive Access program, you can provide all these tools at the lowest available market price to your students. Ask your McGraw Hill representative for more information.

Solutions for your challenges

A product isn't a solution. Real solutions are affordable, reliable, and come with training and ongoing support when you need it and how you want it. Visit supportateverystep.com for videos and resources both you and your students can use throughout the term.

Updated and relevant content

Our new Evergreen delivery model provides the most current and relevant content for your course, hassle-free. Content, tools, and technology updates are delivered directly to your existing McGraw Hill Connect® course. Engage students and freshen up assignments with up-to-date coverage of select topics and assessments, all without having to switch editions or build a new course.

Acknowledgments

We received help from many people as we prepared this book. An insightful group of reviewers commented on this and previous editions of this text. Their comments and suggestions improved the exposition of the material considerably. These reviewers all deserve special thanks for their contributions.

For granting us permission to include many of their examination questions in the text, we are grateful to the CFA Institute.

A special thanks goes to the talented experts who help us develop and review the instructor materials and online content in Connect and LearnSmart, including Vincent Muscolino, Anna Kovalenko, James Forjan, Hyuna Park, John Farlin, Marc-Anthony Isaacs, Nicholas Racculia, and Dongmei Li.

Much credit is also due to the development and production team of McGraw Hill Education: Sarah Hutchings,

Portfolio Manager; Christina Kouvelis, Senior Product Developer; Susan Trentacosti, Lead Core Project Manager; Emily Windelborn, Senior Assessment Project Manager; Sarah Hurley, Marketing Manager; Brianna Kirchbaum, Content Licensing Specialist; and Matt Diamond, Designer.

Finally, once again, our most important debts are to Judy, Hava, and Sheryl for their unflagging support.

A Note from the Authors . . .

The past three decades witnessed rapid and profound change in the investment industry as well as a financial crisis of historic magnitude. The vast expansion of financial markets during this period was due in part to innovations in securitization and credit enhancement that gave birth to new trading strategies. These strategies were in turn made feasible by developments in communication and information technology, as well as by advances in the theory of investments.

Yet the financial crisis of 2008–2009 was also rooted in the cracks of these developments. Many of the innovations in security design facilitated high leverage and an exaggerated notion of the efficacy of risk transfer strategies. This engendered complacency about risk that was coupled with relaxation of regulation as well as reduced transparency that masked the precarious condition of many big players in the system.

Of necessity, our text has evolved along with financial markets. We devote considerable attention to recent breathtaking changes in market structure and trading technology. At the same time, however, many basic *principles* of investments remain important. We continue to organize the book around one basic theme—that security markets are nearly efficient, meaning that you should expect to find few obvious bargains in these markets. Given what we know about securities, their prices usually appropriately reflect their risk and return attributes; free lunches are few and far apart in markets as competitive as these. This starting point remains a powerful approach to security valuation and is remarkably profound in its implications for the design of investment strategies. While the degree of market efficiency is and will always be a matter of debate (in fact we devote a full chapter to the behavioral challenge to the efficient market hypothesis), we hope our discussions throughout the book convey a good dose of healthy skepticism concerning much conventional wisdom.

This text also places great emphasis on *asset allocation*. We prefer this emphasis for two important reasons. First, it corresponds to the procedure that most individuals actually follow when building an investment

portfolio. Typically, you start with all of your money in a bank account, only then considering how much to invest in something riskier that might offer a higher expected return. The logical step at this point is to consider other risky asset classes, such as stocks, bonds, or real estate. This is an asset allocation decision. Second, the asset allocation choice is the primary determinant of the risk-return profile of the investment portfolio, and so it deserves primary attention in a study of investment policy.

Our book also focuses on investment analysis, which allows us to present the practical applications of investment theory and to convey insights of practical value. We provide a systematic collection of Excel spreadsheets that give you tools to explore concepts more deeply. These spreadsheets are available as part of the Connect resources for this text and provide a taste of the sophisticated analytic tools available to professional investors.

In our efforts to link theory to practice, we also have attempted to make our approach consistent with that of the CFA Institute. The Institute administers an education and certification program to candidates seeking designation as a Chartered Financial Analyst (CFA). The CFA Institute curriculum represents the consensus of a committee of distinguished scholars and practitioners regarding the core of knowledge required by the investment professional. We continue to include questions from previous CFA exams in our end-of-chapter problems as well as CFA-style questions derived from the Kaplan-Schweser CFA preparation courses.

This text will introduce you to the major issues of concern to all investors. It can give you the skills to conduct a sophisticated assessment of current issues and debates covered by both the popular media and more specialized finance journals. Whether you plan to become an investment professional or simply a sophisticated individual investor, you will find these skills essential.
