## Every learner is unique

In Connect, instructors can assign an adaptive reading experience with SmartBook® 2.0. Rooted in advanced learning science principles, SmartBook® 2.0 delivers each student a personalized experience, focusing students on their learning gaps, ensuring that the time they spend studying is time well spent.

[mheducation.com/highered/connect/smartbook](http://mheducation.com/highered/connect/smartbook)

## Study anytime, anywhere

Encourage your students to download the free ReadAnywhere® app so they can access their online eBook, SmartBook® 2.0, or Adaptive Learning Assignments when it's convenient, even when they're offline. And since the app automatically syncs with their Connect account, all of their work is available every time they open it. Find out more at [mheducation.com/readanywhere](http://mheducation.com/readanywhere)

***"I really liked this app—it made it easy to study when you don't have your textbook in front of you."***

Jordan Cunningham, a student at Eastern Washington University

## Effective tools for efficient studying

Connect is designed to help students be more productive with simple, flexible, intuitive tools that maximize study time and meet students' individual learning needs. Get learning that works for everyone with Connect.

## Education for all

McGraw Hill works directly with Accessibility Services departments and faculty to meet the learning needs of all students. Please contact your Accessibility Services Office, and ask them to email [accessibility@mheducation.com](mailto:accessibility@mheducation.com), or visit [mheducation.com/about/accessibility](https://mheducation.com/about/accessibility) for more information.

### Affordable solutions, added value

Make technology work for you with LMS integration for single sign-on access, mobile access to the digital textbook, and reports to quickly show you how each of your students is doing. And with our Inclusive Access program, you can provide all these tools at the lowest available market price to your students. Ask your McGraw Hill representative for more information.

### Solutions for your challenges

A product isn't a solution. Real solutions are affordable, reliable, and come with training and ongoing support when you need it and how you want it. Visit [supportateverystep.com](https://supportateverystep.com) for videos and resources both you and your students can use throughout the term.

## Updated and relevant content

Our new Evergreen delivery model provides the most current and relevant content for your course, hassle-free. Content, tools, and technology updates are delivered directly to your existing McGraw Hill Connect® course. Engage students and freshen up assignments with up-to-date coverage of select topics and assessments, all without having to switch editions or build a new course.

# About the Authors

## **Erik W. Larson**

ERIK W. LARSON is professor emeritus of project management at the College of Business, Oregon State University. He teaches executive, graduate, and undergraduate courses on project management and leadership. His research and consulting activities focus on project management. He has published numerous articles on matrix management, product development, and project partnering. He has been honored with teaching awards from both the Oregon State University MBA program and the University of Oregon Executive MBA program. He has been a member of the Project Management Institute since 1984. In 1995 he worked as a Fulbright scholar with faculty at the Krakow Academy of Economics on modernizing Polish business education. He was a visiting professor at Chulalongkorn University in Bangkok, Thailand, and at Baden-Wuerttemberg Cooperative State University in Bad Mergentheim, Germany. He received a B.A. in psychology from Claremont McKenna College and a Ph.D. in management from State University of New York at Buffalo. He is a certified Project Management Professional (PMP) and Scrum master.

## **Clifford F. Gray**

CLIFFORD F. GRAY is professor emeritus of management at the College of Business, Oregon State University. He has personally taught more than 100 executive development seminars and workshops. Cliff has been a member of the Project Management Institute since 1976 and was one of the founders of the Portland, Oregon, chapter. He was a visiting professor at Kasetsart University in Bangkok, Thailand, in 2005. He was the president of Project Management International, Inc. (a training and consulting firm specializing in project management) 1977–2005. He received his B.A. in economics and management from Millikin University, MBA from Indiana University, and doctorate in operations management from the College of Business, University of Oregon. He is a certified Scrum master.

## **Pinyarat Sirisomboonsuk**

PINYARAT SIRISOMBOONSUK is an assistant professor of management at the College of Business, The University of Texas Permian Basin. She teaches courses in project management, operations management, business logistics, risk management in supply chains, and business statistics for both undergraduate and graduate levels in either face-to-face or online formats. Her primary research interests are in the areas of project management, operations management, and supply chain management, which incorporate concepts from strategic management and organizational theory. She has been a member of the Project Management Institute since 2007. She completed her bachelor's degree in economics with first class honors from Chulalongkorn University in Thailand and received her MBA from Oregon State University. She holds a Ph.D. in Operations Management (minor in Industrial Engineering) from Texas Tech University. In 2014, she earned her Project Management Professional (PMP) credential.

*“Man’s mind, once stretched by a new idea, never regains its original dimensions.”*

*Oliver Wendell Holmes, Jr.*

To my family, who have always encircled me with love and encouragement—my parents (Samuel and Charlotte), my wife (Mary), my sons and their wives (Kevin and Dawn, Robert and Sally), and their children (Ryan, Carly, Connor, and Lauren).

C.F.G.

*“The reasonable man adapts himself to the world; the unreasonable one persists in trying to adapt the world to himself. Therefore all progress depends on the unreasonable man.”*

*Bernard Shaw, Man and Superman*

To Ann, whose love and support have brought out the best in me. To our girls Mary, Rachel, and Tor-Tor for the joy and pride they give me. And to our grandkids, Mr. B, Livvy, Jasper Jones!, Ya Ya, Juni, and Calliwumpas, whose future depends upon effective project management. Finally, to my muse, Neil—walk on!

E.W.L.

*“You can do anything you set your mind to.”*

*Benjamin Franklin*

To my parents (Penphim and Ophas) for their unconditional love, their support, their faith in me, and allowing me to choose the direction of my life. To my Thai and U.S. teachers, instructors, professors, and mentors, I am forever indebted. Thanks to all of you for instilling within me not only knowledge but also motivation to achieve and always do my best. The examples all of you set are with me as a guide forever.

P.S.

# Preface

Our motivation in writing this text continues to be to provide a realistic, socio-technical view of project management. In the past, textbooks on project management focused almost exclusively on the tools and processes used to manage projects and not the human dimension. This baffled us, since people, not tools, complete projects! While we firmly believe that mastering tools and processes is essential to successful project management, we also believe that the effectiveness of these tools and methods is shaped and determined by the prevailing culture of the organization and interpersonal dynamics of the people involved. Thus, we try to provide a holistic view that focuses on both the technical and social dimensions and how they interact to determine the fate of projects.

## Audience

This text is written for a wide audience. It covers concepts and skills that are used by managers to propose, plan, budget, manage and lead project teams to successful completions of their projects. The text should prove useful to students and prospective project managers in helping them understand why organizations have developed a formal project management process to gain a competitive advantage. Readers will find the concepts and techniques discussed in enough detail to be immediately useful in new-project situations. Practicing project managers will find the text to be a valuable guide and reference when dealing with typical problems that arise in the course of a project. Managers will also find the text useful in understanding the role of projects in the missions of their organizations. Analysts will find the text useful in helping to explain the data needed for project implementation as well as the operations of inherited or purchased software.

Members of the Project Management Institute will find the text is well structured to meet the needs of those wishing to prepare for PMP (Project Management Professional) or CAPM (Certified Associate in Project Management) certification exams. The text has in-depth coverage of the most critical topics found in PMI's *Project Management Body of Knowledge* (PMBOK) and its supplement guidebook, *Process Groups: A Practice Guide*. People at all levels in the organization assigned to work on projects will find the text useful not only in providing them with a rationale for the use of project management processes but also because of the insights they will gain into how to enhance their contributions to project success.

Our emphasis is not only on how the management process works but also, and more importantly, on *why* it works. The concepts, principles, and techniques are universally applicable. That is, the text does not specialize by industry type or project scope. Instead, the text is written for the individual who will be required to manage a variety of projects in a variety of organizational settings. In the case of some small projects, a few of the steps of the techniques can be omitted, but the conceptual framework applies to all organizations in which projects are important to survival. The approach can be used in pure project organizations such as construction, research organizations, and engineering consultancy firms. At the same time, this approach will benefit organizations that carry out many small projects while the daily effort of delivering products or services continues.

## Content

In this and other editions, we continue to try to resist the forces that engender scope creep and focus only on essential tools and concepts that are being used in the real world. We have been guided by feedback from reviewers, practitioners, teachers, and students. Some changes are minor and incremental, designed to clarify and reduce confusion. Other changes are significant. They represent new developments in the field or better ways of teaching project management principles. Below are major changes to the ninth edition (2024 Release).

- The title of the text has been changed to ***Project Management: A Socio-Technical Approach***. This more accurately captures the emphasis not only on the techniques associated with project management but also on what ultimately determines success—people and how they use these techniques to complete projects. All material has been reviewed and revised based on the latest edition of *Project Management Body of Knowledge* (PMBOK), Seventh Edition, 2020. Note that the newest edition represents a *major shift* in PMBOK toward focusing not only on terms and processes but also behavioral issues associated with managing projects. This has been the focus of this text from the beginning.
- The impact of COVID-19 pandemic on project execution is discussed throughout the text.
- Some of the Snapshots from Practice have been expanded to more fully cover the examples.
- New student exercises and cases have been added to chapters.
- The Snapshot from Practice boxes feature a number of new examples of project management in action.
- The Instructor's Manual contains a listing of current YouTube videos that correspond to key concepts and Snapshots from Practice.

Overall the text addresses the major questions and challenges the authors have encountered over their 80 combined years of teaching project management and consulting with practicing project managers in domestic and foreign environments. These questions include the following: How should projects be prioritized? What factors contribute to project failure or success? How do project managers orchestrate the complex network of relationships involving vendors, subcontractors, project team members, senior management, functional managers, and customers that affect project success? What project management system can be set up to gain some measure of control? How are projects managed when the customers are not sure what they want? How do project managers work with people from foreign cultures?

Project managers must deal with all these concerns to be effective. All of these issues and problems represent linkages to a socio-technical project management perspective. This text focuses not only project management methodology but also on the behavioral skills and cultural awareness necessary to be successful. The chapter content of the text has been placed within an overall framework that integrates these topics in a holistic manner. Cases and snapshots are included from the experiences of practicing managers. The future for project managers is exciting. Careers will be built on successfully managing projects.

## Student Learning Aids

Student resources include study outlines, online quizzes, PowerPoint slides, videos, Microsoft Project Video Tutorials, and web links. These can be found in Connect.

## Acknowledgments

We would like to thank Scott Bailey for his work on the Connect assessments and Test Bank, and Ronny Richards for his quality assurance reviews.

Next, it is important to note that the text includes contributions from numerous students, colleagues, friends, and managers gleaned from professional conversations. We want them to know we sincerely appreciate their counsel and suggestions. Almost every exercise, case, and example in the text is drawn from a real-world project. Special thanks to managers who graciously shared their current project as ideas for exercises, subjects for cases, and examples for the text. John A. Drexler, Jim Moran, John Sloan, Pat Taylor, and John Wold, whose work is printed, are gratefully acknowledged. Special gratitude is due Robert Breitbarth of Interact Management, who shared invaluable insights on prioritizing projects. University students and managers deserve special accolades for identifying problems with earlier drafts of the text and exercises.

We are indebted to the reviewers of past editions who shared our commitment to elevating the instruction of project management. We thank you for your many thoughtful suggestions and for making our book better. Of course, we accept responsibility for the final version of the text.

In addition, we would like to thank our colleagues in the College of Business at Oregon State University for their support and help in completing this project. In particular, we recognize Lacey McNeely, Prem Mathew, and Jeewon Chou for their helpful advice and suggestions. We also wish to thank the many students who helped us at different stages of this project, most notably Neil Young, Saajan Patel, Katherine Knox, Dat Nguyen, and David Dempsey. Mary Gray deserves special credit for editing and working under tight deadlines on earlier editions.

Finally, we want to extend our thanks to all the people at McGraw-Hill Education for their efforts and support. First, we would like to thank Stephanie DeRosa, and David Ploskonka, for providing editorial direction, guidance, and management of the book's development for the eighth edition. And we would also like to thank Sandy Wille, Sandy Ludovissy, Egzon Shaqiri, Beth Cray, and Angela Norris for managing the final production, design, supplement, and media phases of the 2024 Release.

# Guided Tour

## 2 Organization Strategy and Project Selection

### LEARNING OBJECTIVES

After reading this chapter you should be able to:

- 2-1 Explain why it is important for project managers to understand their organization's strategy.
- 2-2 Identify the significant role projects contribute to the strategic direction of the organization.
- 2-3 Understand the need for a project priority system.
- 2-4 Distinguish among three kinds of projects.
- 2-5 Describe how the phase gate model applies to project management.
- 2-6 Apply financial and nonfinancial criteria to assess the value of projects.
- 2-7 Understand how multi-criteria models can be used to select projects.

### OUTLINE

- 2.1 Why Project Managers Need to Understand Strategy
- 2.2 The Strategic Management Process: An Overview
- 2.3 The Need for a Project Priority System
- 2.4 Project Classification
- 2.5 Phase Gate Model
- 2.6 Selection Criteria
- 2.7 Applying a Selection Model
- 2.8 Managing the Portfolio System
- Summary

### Established Learning Objectives

Learning objectives are listed both at the beginning of each chapter and are called out as marginal elements throughout the narrative in each chapter.

#### 2.1 Why Project Managers Need to Understand Strategy

##### LO 2-1

Explain why it is important for project managers to understand their organization's strategy.

Project management historically has been preoccupied solely with execution of projects. Strategy was considered to be under the purview of management. This is old-school thinking. New-school thinking recognizes that project management is at the apex of strategy and operations. Shenhar states when he states, "It is time to expand the traditional role of the project manager to a more strategic perspective. In the modern evolving environment, project managers will be focused on business aspects, and their role will be to get the job done to achieving the business results and winning in the market." There are two main reasons project managers need to understand their organization's mission and strategy. The first reason is so they can make appropriate adjustments. For example, how a project manager would react to modify the design of a product to enhance performance would depend upon whether his/her company strives to be a product leader or a cost leader to achieve operational excellence through low-cost solutions. Since a project manager would respond to delays may vary depending upon the project manager's firm. A project manager will authorize overtime if his/her firm places a premium on the market first. Another project manager will accept the delay if speed is not a priority.

### End-of-Chapter Content

Both static and algorithmic end-of-chapter content, including Review Questions and Exercises, are assignable in Connect.

### SmartBook

The SmartBook has been updated with new highlights and probes for optimal student learning.

### Snapshots

The Snapshot from Practice boxes have been updated to include a number of new examples of project management in action. New discussion questions based on the Snapshots have been added to the end-of-chapter material and are assignable in Connect.

#### SNAPSHOT FROM PRACTICE 2.2

Crisis IT\*

In May 2007, Frontier Airlines Holdings hired Gerry Coady as chief information officer (CIO). Nearly a year later the airline filed for bankruptcy under Chapter 11. In an interview, Coady describes how he managed IT projects during the bankruptcy and recession crisis of 2008–2009.

Fundamentally, Coady faced a situation of too many projects and too few resources. Coady used a strategy of focusing on reducing the number of projects in the portfolio. He put together a steering committee of senior management that reviewed several hundred projects. The end result was a reduction to less than 30 projects remaining in the portfolio.

##### HOW CAN YOU GET TO A BACKLOG OF OVER 100 PROJECTS?

"There are never enough resources to get everything done." Backlogs build over time. Sacred cow projects get included in the selection system. Projects proposed

Matej Kastelic/kasto/123RF

"by the time you get to the 20s the margin of differentiation gets narrower and narrower." Of the remaining projects, project sponsors had to have solid justification why their project was important. Reduction of the number of projects placed emphasis on high-value projects.

### New and Updated Cases

Included at the end of each chapter are between one and five cases that demonstrate key ideas from the text and help students understand how project management comes into play in the real world. Cases have been reviewed and updated across the eighth edition.

### Instructor and Student Resources

Instructors and students can access all of the supplementary resources for the eighth edition within Connect.

# Note to Student

You will find the content of this text highly practical, relevant, and current. The concepts discussed are relatively simple and intuitive. As you study each chapter we suggest you try to grasp not only how things work but also why things work. You are encouraged to use the text as a handbook as you move through the three levels of competency:

I know.

I can do.

I can adapt to new situations.

The field of project management is growing in importance and at an exponential rate. It is nearly impossible to imagine a future management career that does not include management of projects. Resumes of managers will soon be primarily a description of their participation in and contributions to projects.

Good luck on your journey through the text and on your future projects.

## Chapter-by-Chapter Revisions for the 2024 Release Edition

### **Chapter 1: Modern Project Management**

- New Snapshot: PMI's 50 Most Influential Projects: 1969–2019.
- New Appendix: A Guide to the Project Management Body of Knowledge (PMBOK Guide) Seventh Edition and Its Ancillaries.

### **Chapter 2: Organization Strategy and Project Selection**

- Revised Snapshot: IBM's Watson Project
- New Snapshot: Is This the End of Airbnb?
- New segment on behavioral biases that affect project selection.
- Snapshot: Project Code Names revised.

### **Chapter 3: Organization: Structure and Culture**

- New Snapshot: *2021 PMO of the Year* Moffitt Cancer Center.

### **Chapter 4: Defining the Project**

- Requirements is now discussed under defining a project.
- New Snapshot: The Bradley Fighting Vehicle.

### **Chapter 5: Estimating Project Times and Costs**

- New segment on four aspects of estimating.

### **Chapter 6: Developing a Project Schedule**

- Snapshot: Concurrent Engineering (Fast Tracking) updated.
- A new project network exercise.

### **Chapter 7: Managing Risk**

- An example of how pandemic created an opportunity for project is included in the text.
- Minor revisions made to tables to provide better clarity.

### **Chapter 8: Scheduling Resources and Costs**

- New case: *Midnight Sun II Project*.

### **Chapter 9: Reducing Project Duration**

- Snapshot 9.1: *Smartphone Wars* updated.
- New Snapshot: *Operation Warp Speed*.

### **Chapter 10: Being an Effective Project Manager**

- Reliance on virtual communication methods is discussed.
- New Snapshot: *Fighting Zoom Fatigue*.

### **Chapter 11: Managing Project Teams**

- Managing Virtual Teams section has been updated and expanded.
- Managing hybrid teams where people work part time at home is discussed.

### **Chapter 12: Outsourcing: Managing Interorganizational Relations**

- New case: *Umdanso Project*.

### **Chapter 13: Progress and Performance Measurement and Evaluation**

- Snapshot: *Guidelines for Setting Milestones* has been revised.
- New Snapshot: *Oregon State University's Regional Coastal Research Vessels (RCRV) Project*.

### **Chapter 14: Project Closure**

- Discussion of project retrospectives has been updated and revised.
- New Research Highlight: *Why Is It Difficult to Pull the Plug on Projects?*

### **Chapter 15: Agile Project Management**

- Introduction revised.
- Discussion of hybrid project management is expanded.

### **Chapter 16: International Projects**

- New Snapshot: *Avoiding Communication Catastrophes When Emailing Across Cultures*.

### **Appendix Two: Computer Project Exercises**

- Updated two computer exercises.

### **MCGRAW HILL CUSTOMER CARE CONTACT INFORMATION**

At McGraw Hill, we understand that getting the most from new technology can be challenging. That's why our services don't stop after you purchase our products. You can e-mail our Product Specialists 24 hours a day to get product-training online. Or you can search our knowledge bank of Frequently Asked Questions on our support website. For Customer Support, call **800-331-5094** or visit **[www.mhhe.com/support](http://www.mhhe.com/support)**. One of our Technical Support Analysts will be able to assist you in a timely fashion.

# Contents

## Preface viii

## Chapter 1

### Modern Project Management 1

- 1.1 What Is a Project? 5
  - What a Project Is Not* 6
  - Program versus Project* 8
  - The Project Life Cycle* 8
  - The Project Manager* 9
  - Being Part of a Project Team* 11
- 1.2 Agile Project Management 12
- 1.3 Current Drivers of Project Management 14
  - Compression of the Product Life Cycle* 14
  - Knowledge Explosion* 15
  - Triple Bottom Line (Planet, People, Profit)* 15
  - Increased Customer Focus* 15
  - Small Projects Represent Big Problems* 15
- 1.4 Project Management Today: A Socio-Technical Approach 16
- Summary 18

## Chapter 2

### Organization Strategy and Project Selection 30

- 2.1 Why Project Managers Need to Understand Strategy 32
- 2.2 The Strategic Management Process: An Overview 32
  - Four Activities of the Strategic Management Process* 35
- 2.3 The Need for a Project Priority System 37
  - Problem 1: Behavioral Biases* 37
  - Problem 2: The Implementation Gap* 39
  - Problem 3: Organization Politics* 39
  - Problem 4: Resource Conflicts and Multitasking* 40
- 2.4 Project Classification 41
- 2.5 Phase Gate Model 42
- 2.6 Selection Criteria 44

- Financial Criteria* 44
- Nonfinancial Criteria* 46
- Two Multi-Criteria Selection Models* 46

- 2.7 Applying a Selection Model 49
  - Project Classification* 49
  - Sources and Solicitation of Project Proposals* 50
  - Ranking Proposals and Selection of Projects* 51
- 2.8 Managing the Portfolio System 55
  - Senior Management Input* 55
  - Governance Team Responsibilities* 55
  - Balancing the Portfolio for Risks and Types of Projects* 55
- Summary 57

## Chapter 3

### Organization: Structure and Culture 72

- 3.1 Project Management Structures 74
  - Organizing Projects within the Functional Organization* 74
  - Organizing Projects as Dedicated Teams* 76
  - Organizing Projects within a Matrix Arrangement* 81
  - Different Matrix Forms* 83
- 3.2 Project Management Office (PMO) 85
- 3.3 What Is the Right Project Management Structure? 87
  - Organization Considerations* 87
  - Project Considerations* 88
- 3.4 Organizational Culture 89
  - What Is Organizational Culture?* 89
  - Identifying Cultural Characteristics* 91
- 3.5 Implications of Organizational Culture for Organizing Projects 94
- Summary 97

## Chapter 4

### Defining the Project 109

- 4.1 Step 1: Defining the Project Scope 111
  - Employing a Project Scope Checklist* 111
- 4.2 Step 2: Establishing Project Priorities 116

- 4.3 Step 3: Creating the Work Breakdown Structure 118
  - Major Groupings in a WBS* 118
  - How a WBS Helps the Project Manager* 119
  - A Simple WBS Development* 120
- 4.4 Step 4: Integrating the WBS with the Organization 123
- 4.5 Step 5: Coding the WBS for the Information System 125
- 4.6 Process Breakdown Structure 126
- 4.7 Responsibility Matrices 127
- 4.8 Project Communication Plan 130
- Summary 132

## Chapter 5

### Estimating Project Times and Costs 140

- 5.1 Factors Influencing the Quality of Estimates 142
  - Planning Horizon* 142
  - Project Complexity* 143
  - People* 143
  - Project Structure and Organization* 143
  - Padding Estimates* 143
  - Organizational Culture* 143
  - Other Factors* 144
- 5.2 Estimating Guidelines for Times, Costs, and Resources 144
- 5.3 Top-Down versus Bottom-Up Estimating 146
- 5.4 Methods for Estimating Project Times and Costs 148
  - Top-Down Approaches for Estimating Project Times and Costs* 148
  - Bottom-Up Approaches for Estimating Project Times and Costs* 152
  - A Hybrid: Phase Estimating* 153
- 5.5 Level of Detail 155
- 5.6 Types of Costs 157
  - Direct Costs* 157
  - Direct Project Overhead Costs* 157
  - General and Administrative (G&A) Overhead Costs* 157
- 5.7 Refining Estimates 158
- 5.8 Creating a Database for Estimating 160
- 5.9 Mega Projects: A Special Case 161
- Summary 164

## Chapter 6

### Developing a Project Schedule 175

- 6.1 Developing the Project Network 176
- 6.2 From Work Package to Network 177

- 6.3 Constructing a Project Network 179
  - Terminology* 179
  - Basic Rules to Follow in Developing Project Networks* 179
- 6.4 Activity-on-Node (AON) Fundamentals 180
- 6.5 Network Computation Process 183
  - Forward Pass—Earliest Times* 184
  - Backward Pass—Latest Times* 186
  - Determining Slack (or Float)* 187
- 6.6 Using the Forward and Backward Pass Information 190
- 6.7 Level of Detail for Activities 191
- 6.8 Practical Considerations 191
  - Network Logic Errors* 191
  - Activity Numbering* 191
  - Use of Computers to Develop Networks* 192
  - Calendar Dates* 192
  - Multiple Starts and Multiple Projects* 192
- 6.9 Extended Network Techniques to Come Closer to Reality 195
  - Laddering* 195
  - Use of Lags to Reduce Schedule Detail and Project Duration* 195
  - An Example Using Lag Relationships—the Forward and Backward Pass* 199
  - Hammock Activities* 200
- Summary 201

## Chapter 7

### Managing Risk 219

- 7.1 Risk Management Process 221
- 7.2 Step 1: Risk Identification 222
- 7.3 Step 2: Risk Assessment 226
  - Probability Analysis* 229
- 7.4 Step 3: Risk Response Development 230
  - Mitigating Risk* 230
  - Avoiding Risk* 231
  - Transferring Risk* 231
  - Escalating Risk* 233
  - Retaining Risk* 233
- 7.5 Contingency Planning 233
  - Technical Risks* 235
  - Schedule Risks* 236
  - Cost Risks* 236
  - Funding Risks* 236
- 7.6 Opportunity Management 237
- 7.7 Contingency Funding and Time Buffers 238
  - Contingency Reserves* 239
  - Management Reserves* 239
  - Time Buffers* 240

|                                   |     |
|-----------------------------------|-----|
| 7.8 Step 4: Risk Response Control | 240 |
| 7.9 Change Control Management     | 241 |
| Summary                           | 244 |

## Chapter 8

### Scheduling Resources and Costs 265

|   |     |
|---|-----|
| 8.1 Overview of the Resource Scheduling Problem                     | 267 |
| 8.2 Types of Resource Constraints                                   | 268 |
| 8.3 Classification of a Scheduling Problem                          | 270 |
| 8.4 Resource Allocation Methods                                     | 270 |
| <i>Assumptions</i>  | 270 |
| <i>Time-Constrained Projects: Smoothing</i>                         |     |
| <i>Resource Demand</i>  | 270 |
| <i>Resource-Constrained Projects</i>                                | 272 |
| 8.5 Computer Demonstration of Resource-Constrained Scheduling       | 277 |
| <i>The Impacts of Resource-Constrained Scheduling</i>               | 281 |
| 8.6 Splitting Activities  | 284 |
| 8.7 Benefits of Scheduling Resources                                | 285 |
| 8.8 Assigning Project Work  | 286 |
| 8.9 Multiproject Resource Schedules                                 | 287 |
| 8.10 Using the Resource Schedule to Develop a Project Cost Baseline | 288 |
| <i>Why a Time-Phased Budget Baseline Is Needed</i>                  | 288 |
| <i>Creating a Time-Phased Budget</i>                                | 289 |
| Summary   | 294 |

## Chapter 9

### Reducing Project Duration 326

|   |     |
|---|-----|
| 9.1 Rationale for Reducing Project Duration       | 328 |
| 9.2 Options for Accelerating Project Completion   | 329 |
| <i>Options When Resources Are Not Constrained</i> | 329 |
| <i>Options When Resources Are Constrained</i>     | 332 |
| 9.3 Project Cost-Duration Graph                   | 334 |
| <i>Explanation of Project Costs</i>               | 334 |
| 9.4 Constructing a Project Cost-Duration Graph    | 337 |
| <i>Determining the Activities to Shorten</i>      | 337 |
| <i>A Simplified Example</i>                       | 338 |
| 9.5 Practical Considerations                      | 341 |
| <i>Using the Project Cost-Duration Graph</i>      | 341 |
| <i>Crash Times</i>                                | 342 |
| <i>Linearity Assumption</i>                       | 342 |
| <i>Choice of Activities to Crash Revisited</i>    | 342 |
| <i>Time Reduction Decisions and Sensitivity</i>   | 344 |

|  |     |
|--|-----|
| 9.6 What If Cost, Not Time, Is the Issue?                      | 344 |
| <i>Reduce Project Scope</i>                                    | 345 |
| <i>Have Owner Take on More Responsibility</i>                  | 345 |
| <i>Outsource Project Activities or Even the Entire Project</i> | 345 |
| <i>Brainstorm Cost Savings Options</i>                         | 345 |
| Summary  | 346 |

## Chapter 10

### Being an Effective Project Manager 363

|  |     |
|--|-----|
| 10.1 Managing versus Leading a Project               | 365 |
| 10.2 Engaging Project Stakeholders                   | 366 |
| 10.3 Influence as Exchange                           | 370 |
| <i>Task-Related Currencies</i>                       | 371 |
| <i>Position-Related Currencies</i>                   | 372 |
| <i>Inspiration-Related Currencies</i>                | 372 |
| <i>Relationship-Related Currencies</i>               | 372 |
| <i>Personal-Related Currencies</i>                   | 373 |
| 10.4 Social Network Building                         | 373 |
| <i>Mapping Stakeholder Dependencies</i>              | 373 |
| <i>Management by Wandering Around (MBWA)</i>         | 375 |
| <i>Managing Upward Relations</i>                     | 378 |
| <i>Leading by Example</i>                            | 379 |
| 10.5 Ethics and Project Management                   | 382 |
| 10.6 Building Trust: The Key to Exercising Influence | 384 |
| 10.7 Qualities of an Effective Project Manager       | 385 |
| Summary  | 388 |

## Chapter 11

### Managing Project Teams 401

|   |     |
|---|-----|
| 11.1 The Five-Stage Team Development Model          | 404 |
| 11.2 Situational Factors Affecting Team Development | 406 |
| 11.3 Building High-Performance Project Teams        | 408 |
| <i>Recruiting Project Members</i>                   | 408 |
| <i>Conducting Project Meetings</i>                  | 409 |
| <i>Establishing Team Norms</i>                      | 411 |
| <i>Establishing a Team Identity</i>                 | 414 |
| <i>Creating a Shared Vision</i>                     | 415 |
| <i>Managing Project Reward Systems</i>              | 417 |
| <i>Orchestrating the Decision-Making Process</i>    | 419 |
| <i>Managing Conflict within the Project</i>         | 421 |
| <i>Rejuvenating the Project Team</i>                | 424 |
| 11.4 Managing Virtual Project Teams                 | 426 |
| <i>Mixed Project Teams</i>                          | 430 |
| <i>Hybrid Project Teams</i>                         | 430 |

- 11.5 Project Team Pitfalls 431
  - Groupthink* 431
  - Bureaucratic Bypass Syndrome* 431
  - Team Spirit Becomes Team Infatuation* 432
  - Going Local* 432
- Summary 433

## Chapter 12

### Outsourcing: Managing Interorganizational Relations 445

- 12.1 Outsourcing Project Work 447
- 12.2 Request for Proposal (RFP) 451
  - Selection of Contractor from Bid Proposals* 452
- 12.3 Best Practices in Outsourcing Project Work 453
  - Well-Defined Requirements and Procedures* 453
  - Extensive Training and Team-Building Activities* 455
  - Well-Established Conflict Management Processes in Place* 456
  - Frequent Review and Status Updates* 458
  - Co-location When Needed* 459
  - Fair and Incentive-Laden Contracts* 460
  - Long-Term Outsourcing Relationships* 460
- 12.4 The Art of Negotiating 461
  - 1. *Separate the People from the Problem* 462
  - 2. *Focus on Interests, Not Positions* 463
  - 3. *Invent Options for Mutual Gain* 464
  - 4. *When Possible, Use Objective Criteria* 465
  - Dealing with Unreasonable People* 465
- 12.5 A Note on Managing Customer Relations 466
- Summary 469

## Chapter 13 485

### Progress and Performance Measurement and Evaluation 485

- 13.1 Structure of a Project Monitoring Information System 486
  - What Data Are Collected?* 486
  - Collecting Data and Analysis* 487
  - Reports and Reporting* 487
- 13.2 The Project Control Process 488
  - Step 1: Setting a Baseline Plan* 488
  - Step 2: Measuring Progress and Performance* 488
  - Step 3: Comparing Plan against Actual* 488
  - Step 4: Taking Action* 488

- 13.3 Monitoring Time Performance 489
  - Tracking Gantt Chart* 489
  - Control Chart* 489
  - Milestone Schedules* 491
- 13.4 Earned Value Management (EVM) 491
  - The Need for Earned Value Management* 491
  - Percent Complete Rule* 495
  - What Costs Are Included in Baselines?* 495
  - Methods of Variance Analysis* 496
- 13.5 Developing a Status Report: A Hypothetical Example 498
  - Assumptions* 498
  - Baseline Development* 498
  - Development of the Status Report* 499
- 13.6 Indexes to Monitor Progress 503
  - Performance Indexes* 504
  - Project Percent Complete Indexes* 505
  - Software for Project Cost/Schedule Systems* 505
  - Additional Earned Value Rules* 506
- 13.7 Forecasting Final Project Cost 507
- 13.8 Other Control Issues 509
  - Technical Performance Measurement* 509
  - Scope Creep* 511
  - Baseline Changes* 512
  - The Costs and Problems of Data Acquisition* 516
- Summary 517

## Chapter 14

### Project Closure 543

- 14.1 Types of Project Closure 545
- 14.2 Wrap-up Closure Activities 548
- 14.3 Project Audits 551
  - The Project Audit Process* 552
  - Project Retrospectives* 554
- 14.4 Project Audits: The Big Picture 556
  - Level 1: Ad Hoc Project Management* 557
  - Level 2: Formal Application of Project Management* 558
  - Level 3: Institutionalization of Project Management* 558
  - Level 4: Management of Project Management System* 558
  - Level 5: Optimization of Project Management System* 559
- 14.5 Post-implementation Evaluation 560
  - Team Evaluation* 560
  - Individual, Team Member, and Project Manager Performance Reviews* 561
- Summary 564

## Chapter 15

### Agile Project Management 573

- 15.1 Traditional versus Agile Methods 575
- 15.2 Agile PM 577
- 15.3 Agile PM in Action: Scrum 580
  - Roles and Responsibilities* 581
  - Scrum Meetings* 582
  - Product and Sprint Backlogs* 584
  - Sprint and Release Burndown Charts* 585
- 15.4 Extreme Programming and Kanban 587
  - Extreme Programming (XP)* 587
  - Kanban* 588
- 15.5 Applying Agile PM to Large Projects 589
- 15.6 Limitations and Concerns 590
- 15.7 Hybrid Project Management 591
- Summary 592

## Chapter 16

### International Projects 601

- 16.1 Environmental Factors 603
  - Legal/Political Factors* 603
  - Security* 604
  - Geography* 605
  - Economic Factors* 605
  - Infrastructure* 607
  - Culture* 608

- 16.2 Project Site Selection 610
- 16.3 Cross-Cultural Considerations: A Closer Look 611
  - Adjustments* 612
  - Working in Mexico* 615
  - Working in France* 617
  - Working in Saudi Arabia* 618
  - Working in China* 619
  - Working in the United States* 620
  - Summary Comments about Working in Different Cultures* 622
  - Culture Shock* 623
- 16.4 Selection and Training for International Projects 626
- Summary 628

### Appendix One: Solutions to Selected Exercises 637

### Appendix Two: Computer Project Exercises 650

### Glossary 666

### Acronyms 673

### Project Management Equations 674

### A Socio-Technical Approach to Project Management 675

### Index 676
