SMARTBOOK VS. SMARTBOOK 2.0
ENHANCEMENTS GUIDE

Available within Connect, SmartBook 2.0 is the next generation of the original SmartBook adaptive learning solution. See how we made the best parts of SmartBook even better.

Instructor Experience Enhancements

- **More Control:** Gain more insight into the content available to assign and customize it to your syllabus needs. You can also create content review assignments to help students prepare for high-stakes assessments.

- **Assignable Sub-Topics:** You now have even more flexibility and control over assignment topics. Assign homework down to the sub-topic level.

- **Actionable Reports:** Improved instructor performance reporting and analytics better assist you in focused teaching and remediation at the class and student level.

Student Experience Enhancements

- **Mobile Learning:** SmartBook 2.0 is now available on all mobile smart devices – both online and offline.

- **More Personalized:** Enhanced learning techniques help students retain information and gain confidence about their knowledge of the material, limiting guessing and rote memorization for greater concept retention.

- **Improved Student Recharge:** Students can now recharge their learning by accessing previously completed assignments with a personalized learning experience focused on areas that need extra attention.

- **Concept Resources:** We've revamped the remediation process within SmartBook 2.0 to give your students greater exposure to contextual material.

- **Accessibility:** SmartBook 2.0 was built from the ground up with accessibility in mind. It includes appropriate color contrast, keyboard navigation, and screen reader usability to support students with accessibility needs.

- **Pop-Up Tips & Prompts:** SmartBook 2.0 now includes clear pop-up and text prompts to guide students efficiently through the learning experience.
